Junior Survey Developer

The role of the Survey Developer is to execute and deliver market research surveys using specific VB based software sometimes in combination with web technologies (such as JavaScript and HTML). This position combines development, quality assurance and direct communication with clients.

What are the requirements:

- Analytical skills and attention to details;
- Ability to effectively prioritize and execute tasks in a fast pace environment and meet strict deadlines.
- University Degree in Mathematics/Statistics/Information Systems/Sciences/Engineering or related subject area;
- Excellent English skills;
- Knowledge in JavaScript, VBscript, HTML and CSS will be a plus;
- Experience with Decipher / ConfimIt / or other survey programming or data processing software will be considered as an advantage.

- **What we offer:**
-
- Work in a dynamic and collaborative team of professionals;
- Learn new things on daily basis and up-skill yourself;
- Participate in different trainings and development programs;
- Get excellent remuneration package and additional benefits – Multisport cards, relax in the office, Food vouchers, Additional health insurance and others;
- Become part of excellent working environment in an international company with offices all over the world.
