METHODOLOGY

The survey is conducted monthly in 26 countries around the world via the Ipsos Online Panel system. The countries included are Argentina, Australia, Belgium, Brazil, Canada, China, France, Great Britain, Germany, Hungary, India, Israel, Italy, Japan, Mexico, Peru, Poland, Russia, Saudi Arabia, Serbia, South Africa, South Korea, Spain, Sweden, Turkey and the United States of America.

An international sample of 18,550 adults aged 18-64 in Canada, Israel and the US, and aged 16-64 in all other countries, were interviewed between April 21st and May 5th 2017.

Approximately 1000+ individuals participated on a country by country basis via the Ipsos Online Panel with the exception of Argentina, Belgium, Hungary, India, Israel, Mexico, Peru, Poland, Russia, Saudi Arabia, South Africa, South Korea, Sweden and Turkey, where each have a sample of approximately 500+.

Weighting has been employed to balance demographics and ensure that the sample's composition reflects that of the adult population according to the most recent country census data.

A survey with an unweighted probability sample of this size would have an estimated margin of error of +/- 3.1 percentage points for a sample of 1,000 and an estimated margin of error of +/- 4.5 percentage points for a 500 sample 19 times out of 20.

In 17 of the 26 countries surveyed internet penetration is sufficiently high to think of the samples as representative of the wider population within the age ranges covered: Argentina, Australia, Belgium, Canada, France, Germany, Hungary, Israel, Italy, Japan, Poland, Serbia, South Korea, Spain, Sweden, Great Britain and United States.

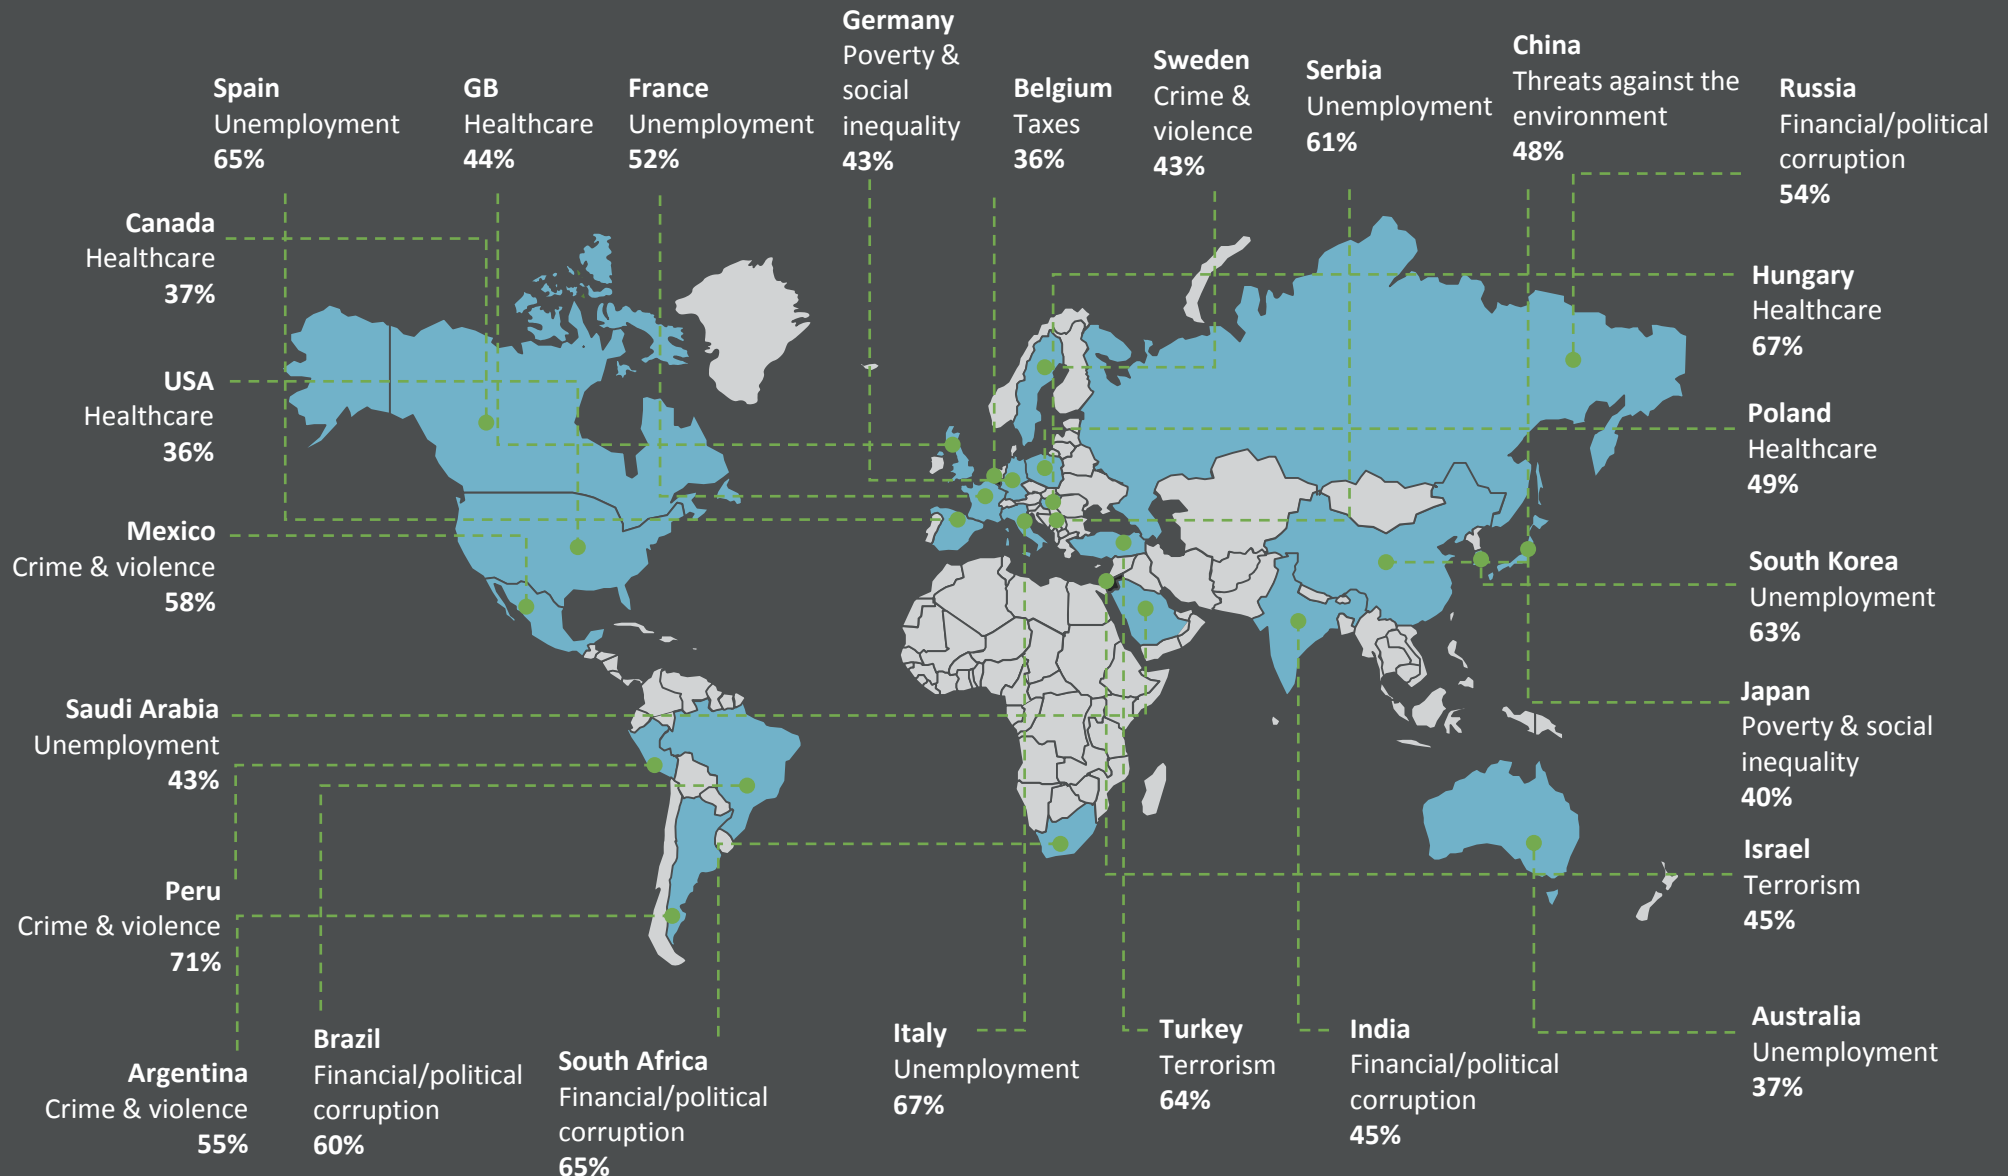

Brazil, China, India, Mexico, Russia, Saudi Arabia, South Africa and Turkey have lower levels of internet penetration and so these samples should not be considered nationally representative, and instead be considered to represent a more affluent, connected population. These are still a vital social group to understand in these countries, representing an important and emerging middle class.

APPENDIX

MOST WORRYING ISSUE BY COUNTRY

Which three of the following topics do you find the most worrying in your country?

Base: Representative sample of 18,550 adults aged 16-64 in 26 participating countries, April 21st - May 5th 2017.
