QA**

**GAME CHANGERS**

# (JUNIOR) DATA QA

## Main Responsibilities:

The role of the Data QA is to execute scripts for ensuring the quality of collected data for online market research surveys using specific VB script based software. This position combines scripting, quality assurance and internal communication with operation teams.

It's the perfect match for someone who has attention to the details and willingness to meet new challenges.

## Personal Requirements:

- Attention to details and analytical mind set;
- Ability to work both independently and in a team;
- To respect and meet deadlines;
- Effective prioritization and execution of tasks in a fast pace environment;

## Position Requirements:

- Experience in Automation QA and/or with any survey programming or data processing software (Dimensions, Quantum etc.) will be considered as an advantage;
- Ability to communicate independently in English (written and verbal);
- University Degree in Mathematics/Statistics/Information Systems/Sciences/Engineering or related subject area (or last year student able to work on full time);

## What we offer:

- Work in a dynamic and collaborative team of professionals;
- Learn new things on daily basis and up-skill yourself;
- Participate in different trainings and development programs;
- Get excellent remuneration package and additional benefits – Fitness cards, Massages in the office, Food vouchers, Additional health insurance and others;
- Become part of excellent working environment in an international company with offices all over the world;
