SURVEY CONTENTS:

THE SURVEY MEASURES FIVE KEY ELEMENTS (AS WELL AS EXPLORING A NUMBER OF BACKGROUND QUESTIONS [TO PROVIDE YOU WITH ADDED INSIGHT AND CONTEXT])

1. REPUTATION:

How favourably journalists regard your brand across a range of reputation-defining attributes — and how this compares with your competitors.

Open-ended questions provide journalists with the opportunity to explore the specific reasons for their rankings.

2. MEDIA & PRESS RELATIONS:

The performance and effectiveness of your organisation's media relations, how successfully your organisation engages with influential journalists, and how you can strengthen these relationships.

3. PRODUCT QUALITY:

Journalists rate each company's products, as well as stating who they consider to be the best provider in a range of financial services categories.

4. PRODUCT PROMOTIONS:

The extent to which your advertising and marketing activity is cutting through with journalists, and how they perceive your campaigns.

5. EXCLUSIVE TAILOR-MADE QUESTIONS

Survey subscribers have the opportunity to add their own tailor-made questions.

These metrics help to dig deeper into the drivers of your reputation and media relations, and provide a detailed picture of where you are positioned relative to your competitors.

A simple three-step process to buy in to the survey:
