GAME CHANGERS

SUMMARY OF FINDINGS

On average, across 28 countries

Highest in:

ride a bicycle at least once a week

India

ride a bicycle to commute

Netherlands

ride a bicycle for exercise

Poland

ride a bicycle more than any other mode of transportation for a 2-km or 1-mile distance

Netherlands

say new road and infrastructure in their area should prioritize bicycles over automobiles

Peru

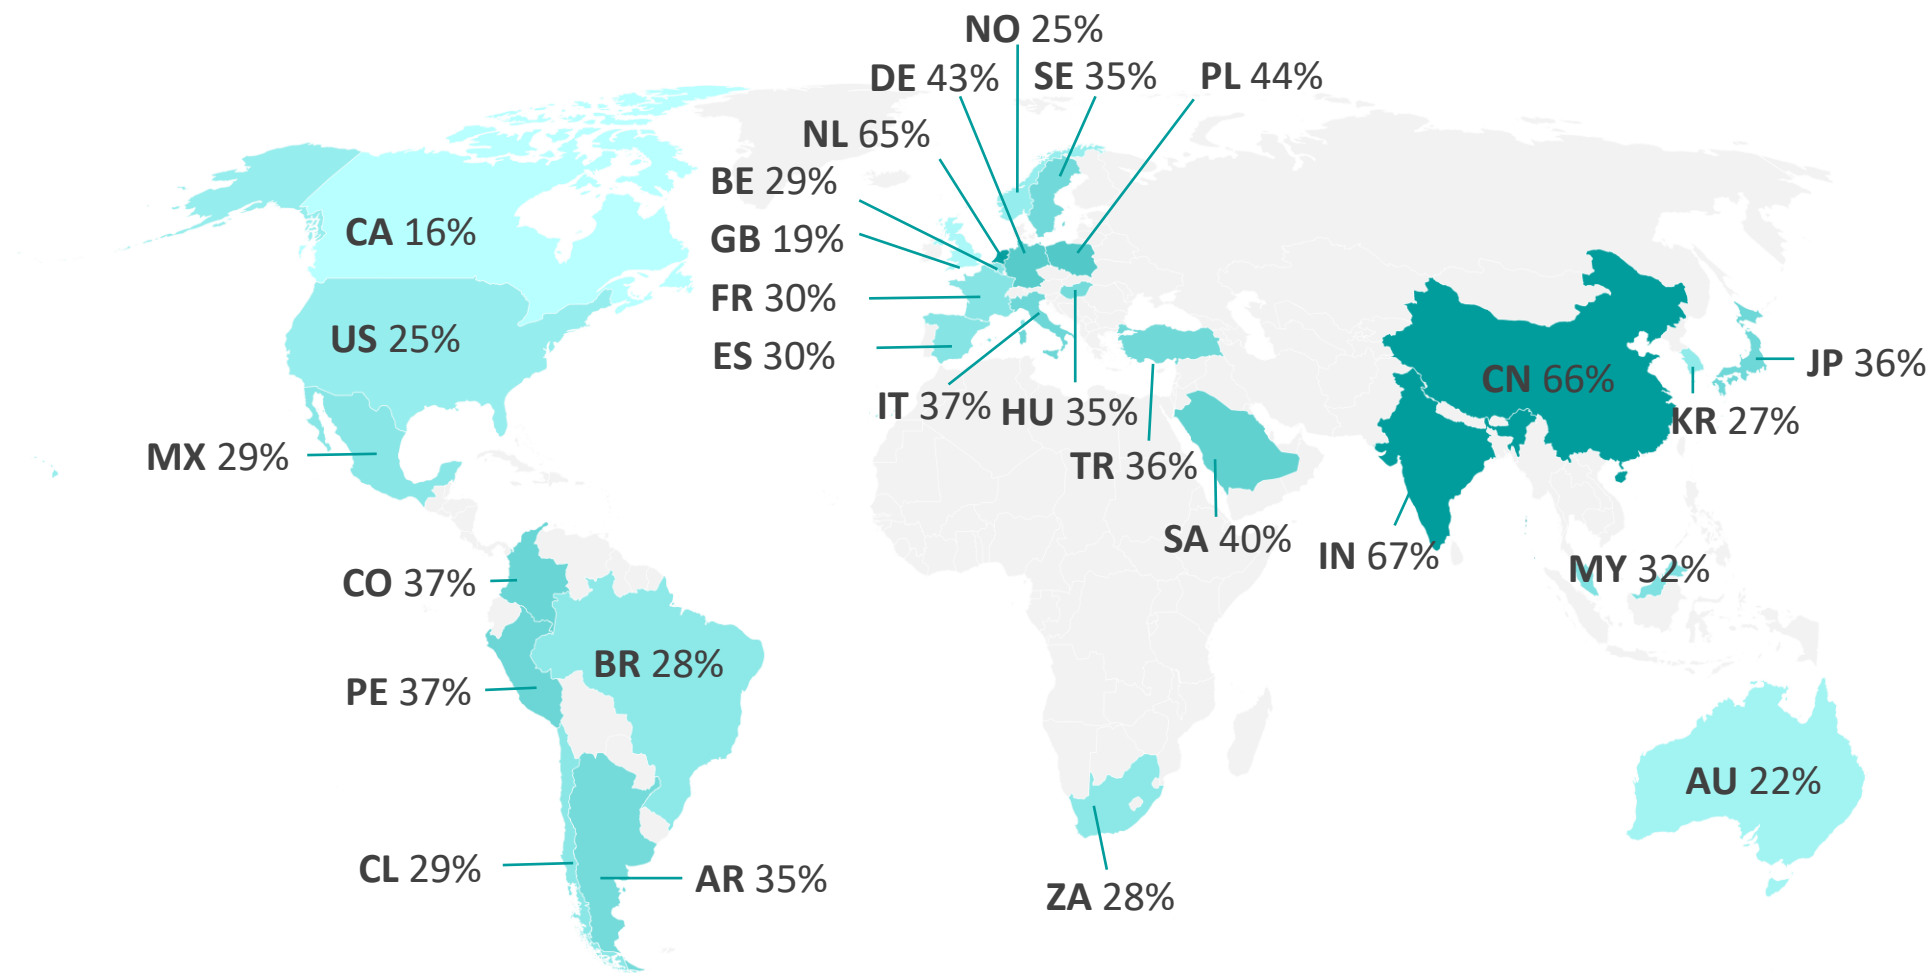

say cycling from one place to another in their area is too dangerous

Chile/Colombia

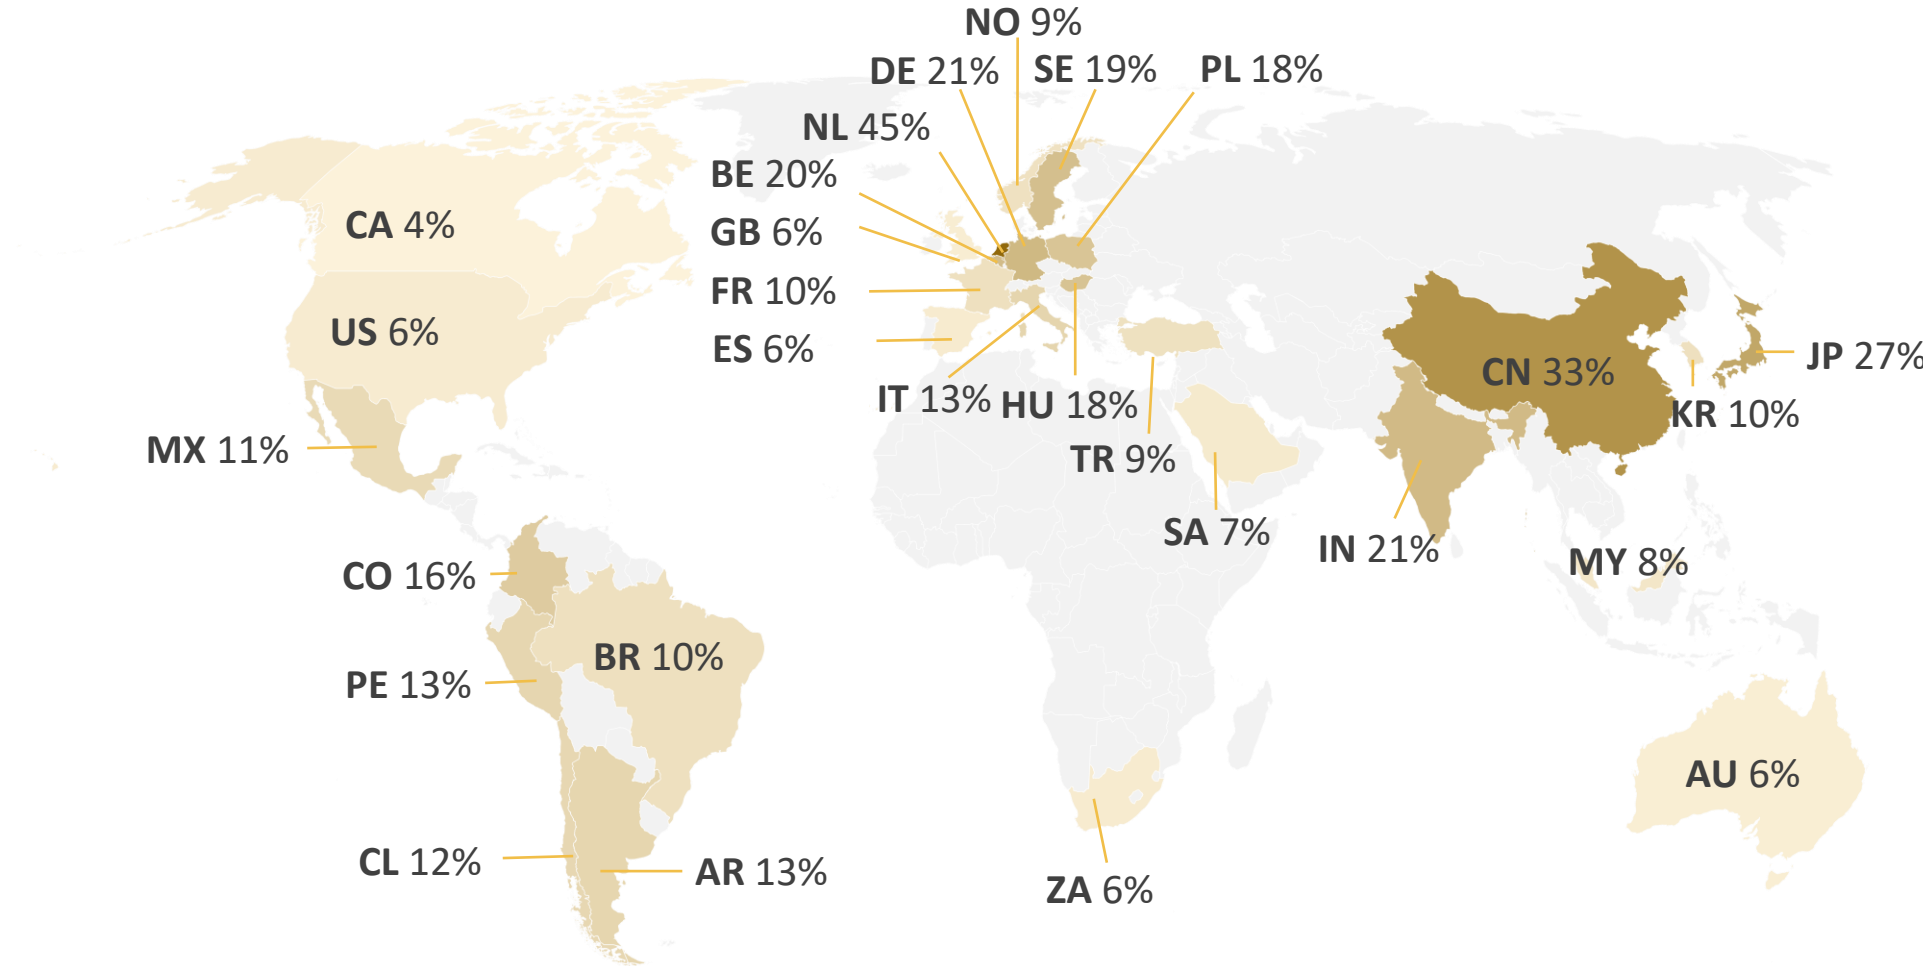

% OF ADULTS RIDING A BICYCLE AT LEAST ONCE A WEEK

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

% OF ADULTS USING A BICYCLE AS THEIR PRIMARY MODE OF TRANSPORTATION FOR A 2-KILOMETER OR 1-MILE DISTANCE

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

THE SAFER PEOPLE FEEL, THE MORE THEY CYCLE

Base: 20, 507 online adults across 28 countries
The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

BICYCLE USAGE

Q. Please select all the statements below that apply to you.

Base: 20,507 online adults across 28 countries

The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result. The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“I KNOW HOW TO RIDE A BICYCLE”

Base: 20, 507 online adults across 28 countries

The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result. The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“I OWN A BICYCLE THAT I CAN USE PERSONALLY”

Base: 20, 507 online adults across 28 countries

The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result. The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“I RIDE A BICYCLE FOR EXERCISE”

Base: 20, 507 online adults across 28 countries

The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result. The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“I DO NOT HAVE ACCESS TO A CAR I CAN USE”

Base: 20, 507 online adults across 28 countries
 The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
 The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“I RIDE A BICYCLE TO GET TO MY PLACE OF WORK OR EDUCATION”

Base: 20, 507 online adults across 28 countries

The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result. The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“I USE PUBLIC BICYCLE-SHARING SYSTEMS”

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

BICYCLE-RIDING FREQUENCY

Q. How often do you ride a bicycle?

At least once a week

At least once a week

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

PRIMARY MODE FOR 2KM/1MI DISTANCE

Q. Which mode of transportation do you use most often for short distances of about 2 kilometers / 1 mile in your neighborhood?

	28-Country Average	Highest in:	Lowest in:
Walk	37%	Great Britain (65%), Spain (55%), Turkey (49%)	Malaysia (13%)
Own automobile	25%	USA (47%), Canada (43%), Malaysia (41%)	Peru (9%)
Bicycle	14%	Netherlands (45%), China (33%), Japan (27%)	Canada (4%)
Public transit	12%	Peru (32%), Argentina (27%), Chile (24%)	USA (3%)
Motorcycle or moped	4%	Malaysia (24%), India (19%), Colombia (9%)	Canada/South Korea (0%)
Taxi or ride-share vehicle	3%	South Africa (11%), Saudi Arabia (8%), Peru (7%)	Belgium/Poland (0%)
Comb. public transit + bike or scooter rental	3%	China (9%), India/South Korea (6%)	Multiple (1%)
Electric standup scooters	1%		
Other	2%		

Base: 20, 507 online adults across 28 countries

The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result. The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

BICYCLE AS PRIMARY MODE FOR 2KM/1MI DISTANCE

Q. Which mode of transportation do you use most often for short distances of about 2 kilometers / 1 mile in your neighborhood? % for “Bicycle”

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

OPINIONS ABOUT CYCLING

Q. Please indicate how much you agree or disagree with the following statements

28-Country Average

	% Agree	Highest in:	Lowest in:
Cycling plays an important role in the reduction of carbon emissions	86%	Peru/China (94%), Turkey (92%)	Germany (77%)
Cycling plays an important part in the reduction of traffic	80%	Peru (94%), Brazil/China (91%)	USA (62%)
Cycling is an urban trend	68%	Peru (86%), Colombia (83%), Chile (82%)	Hungary (41%)
New road and traffic infrastructure projects in my area should prioritize bicycles over automobiles	64%	Peru (86%), Saudi Arabia/Turkey (83%)	Canada (41%)
Cyclists in my area frequently disrespect traffic rules and regulation	64%	Italy (76%), Saudi Arabia/Spain (73%)	South Africa (43%)
Cyclists represent as much a danger to pedestrians as do automobiles or motorcycles/mopeds	59%	Japan (82%), Australia/Germany/Italy (70%)	Brazil (42%)
Cyclists represent a danger to drivers	55%	Japan (82%), South Korea (69%), Australia/Italy (68%)	Brazil (36%)
Cycling from one place to another in my area is too dangerous	52%	Chile/Colombia (70%), Mexico/Peru (68%)	Netherlands (14%)
The cycling infrastructure (e.g., dedicated bicycle lanes) in my area is excellent	48%	Netherlands (81%), China (74%), Saudi Arabia (73%)	Japan (28%)

Base: 20, 507 online adults across 28 countries

The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result. The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“CYCLING PLAYS AN IMPORTANT ROLE IN THE REDUCTION OF CARBON EMISSIONS”

Base: 20, 507 online adults across 28 countries
The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“CYCLING PLAYS AN IMPORTANT PART IN THE REDUCTION OF TRAFFIC”

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“CYCLING IS AN URBAN TREND”

Base: 20, 507 online adults across 28 countries
The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“NEW ROAD AND TRAFFIC INFRASTRUCTURE PROJECTS IN MY AREA SHOULD PRIORITIZE BICYCLES OVER AUTOMOBILES”

Base: 20, 507 online adults across 28 countries
The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“CYCLISTS IN MY AREA FREQUENTLY DISRESPECT TRAFFIC RULES AND REGULATION”

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“CYCLISTS REPRESENT AS MUCH A DANGER TO PEDESTRIANS AS DO AUTOMOBILES OR MOTORCYCLES/MOPEDS”

Base: 20, 507 online adults across 28 countries
The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“CYCLISTS REPRESENT A DANGER TO DRIVERS”

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“CYCLING FROM ONE PLACE TO ANOTHER IN MY AREA IS TOO DANGEROUS”

Base: 20, 507 online adults across 28 countries
The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

“THE CYCLING INFRASTRUCTURE (E.G., DEDICATED BICYCLE LANES) IN MY AREA IS EXCELLENT”

Base: 20, 507 online adults across 28 countries
The “Global Country Average” reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

FAVORABILITY TOWARD TRANSPORTATION MODES

Q. Generally speaking, do you have a favorable or unfavorable opinion of the way the following methods of transportation are used in your community

Base: 20, 507 online adults across 28 countries

The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result. The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

FAVORABILITY TOWARD BICYCLES

Q. Generally speaking, do you have a favorable or unfavorable opinion of the way the following methods of transportation are used in your community

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

FAVORABILITY TOWARD AUTOMOBILES

Q. Generally speaking, do you have a favorable or unfavorable opinion of the way the following methods of transportation are used in your community

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

FAVORABILITY TOWARD ELECTRIC BICYCLES (E-BIKES)

Q. Generally speaking, do you have a favorable or unfavorable opinion of the way the following methods of transportation are used in your community

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

FAVORABILITY TOWARD MOTORCYCLES/MOPEDS

Q. Generally speaking, do you have a favorable or unfavorable opinion of the way the following methods of transportation are used in your community

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

FAVORABILITY TOWARD STANDUP SCOOTERS

Q. Generally speaking, do you have a favorable or unfavorable opinion of the way the following methods of transportation are used in your community

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

FAVORABILITY TOWARD TRUCKS

Q. Generally speaking, do you have a favorable or unfavorable opinion of the way the following methods of transportation are used in your community

Base: 20, 507 online adults across 28 countries
The "Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.
The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population.

Methodology

These are the findings of a 28-country Ipsos survey conducted March 25 – April 8, 2022, among 20,057 adults aged 16-99 in Norway, 18-74 in the United States, Canada, Malaysia, South Africa, and Turkey, and 16-74 in 22 other countries, via Ipsos's Global Advisor online survey platform.

Each country's sample consists of ca. 1,000 individuals in Argentina, Australia, Brazil, Canada, China (mainland), France, Germany, Great Britain, Italy, Japan, Spain, and the United States, and ca. 500 individuals in Belgium, Chile, Colombia, Hungary, India, Malaysia, Mexico, Norway, the Netherlands, Peru, Poland, Saudi Arabia, South Africa, South Korea, Sweden, and Turkey.

The samples in Argentina, Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Italy, Japan, the Netherlands, Norway, Poland, South Korea, Spain, Sweden, and the United States can be taken as representative of these countries' general adult population under the age of 75.

The samples in Brazil, Chile, China (mainland), Colombia, India, Malaysia, Mexico, Peru, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population. The survey results for these markets should be viewed as reflecting the views of the more "connected" segment of their population.

The data is weighted so that each market's sample composition best reflects the demographic profile of the adult population according to the most recent census data.

The Global average reflects the average result of all the countries and markets where the survey was conducted that year. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.

Where results do not sum to 100 or the 'difference' appears to be +/-1 more/less than the actual, this may be due to rounding, multiple responses or the exclusion of don't knows or not stated responses.

The precision of Ipsos online polls is calculated using a credibility interval with a poll of 1,000 accurate to +/- 3.5 percentage points and of 500 accurate to +/- 4.8 percentage points. For more information on Ipsos's use of credibility intervals, please visit the Ipsos website.

The publication of these findings abides by local rules and regulations.

ABOUT IPSOS

Ipsos is the third largest market research company in the world, present in 90 markets and employing more than 18,000 people.

Our research professionals, analysts and scientists have built unique multi-specialist capabilities that provide powerful insights into the actions, opinions and motivations of citizens, consumers, patients, customers or employees. Our 75 business solutions are based on primary data coming from our surveys, social media monitoring, and qualitative or observational techniques.

“Game Changers” – our tagline – summarises our ambition to help our 5,000 clients to navigate more easily our deeply changing world.

Founded in France in 1975, Ipsos is listed on the Euronext Paris since July 1st, 1999. The company is part of the SBF 120 and the Mid-60 index and is eligible for the Deferred Settlement Service (SRD).

GAME CHANGERS

In our world of rapid change, the need for reliable information to make confident decisions has never been greater.

At Ipsos we believe our clients need more than a data supplier, they need a partner who can produce accurate and relevant information and turn it into actionable truth.

This is why our passionately curious experts not only provide the most precise measurement, but shape it to provide True Understanding of Society, Markets and People.

To do this we use the best of science, technology and know-how and apply the principles of security, simplicity, speed and substance to everything we do.

So that our clients can act faster, smarter and bolder.
Ultimately, success comes down to a simple truth:
You act better when you are sure.
