

Lionel Chaîne, representing Bpifrance Investissement

Independent Director and member of the Strategy Committee

Bpifrance helps companies - at every stage of their development - with credit, guarantees and equity capital. It supports them in their innovation and international projects. Bpifrance now also supports their export activities through a wide range of products. Consulting, universities, networking and acceleration programs for start-ups, SMEs and ETIs are also part of the range of services offered to entrepreneurs. Thanks to Bpifrance and its 50 regional offices, entrepreneurs benefit from a single, close and efficient contact to help them meet their challenges.

Bpifrance Investissement is the company that manages Bpifrance's equity investments.

The Lac1 fund, which is managed by Bpifrance Investissement, invests in the longterm capital of listed French multinationals, and is involved in their governance. It has an investment capacity of 5.2 billion euros, following an initial fund-raising - alongside Bpifrance - with some thirty subscribers, including French and international institutional investors, major companies and family offices. Lac1 draws on Bpifrance's position within its ecosystem, its knowledge of technological and environmental transitions, and its expertise in the governance of listed companies.

Bpifrance Investissement is represented by Lionel Chaîne

Lionel Chaîne is Chief Information Officer at Bpifrance. He combines in-depth expertise in IS strategy, IS management and change management with a proven ability to manage major programs on an international scale, including offshore/nearshore teams. Equally skilled in investment budget management and contract negotiations, he has demonstrated a strong ability to develop and implement quality methodologies and procedures in the industrial and service sectors.

Lionel Chaîne has solid experience in managing service centers, leading teams and effectively organizing their operations. He has worked effectively in international and multicultural environments, where he has won recognition for his ability to use agile methods and lean IT to improve project efficiency and productivity.

His sector skills cover Banking, Investment, Parcel and Mail Logistics, eCommerce, Finance (cost accounting, general accounting), Purchasing and Management (material and intellectual procurement), Sales and Invoicing, Track and Trace, Computer-aided Maintenance Management (CMMS) and Human Resources.
