EXPECTATIONS SURVEY FOR NORGES BANK Q2 2026

The survey questions economists, social partners, business leaders
and households

21 May 2026

Preface

On commission by Norges Bank, Ipsos carries out quarterly surveys in Norway of expectations for inflation, wage growth and interest rates among economists in the financial industry and academia, the social partners, business leaders and households. Norges Bank orients monetary policy towards keeping inflation low and stable. Inflation expectations can influence actual inflation. A survey conducted at regular intervals can provide greater insight into these questions.

The survey questions four target groups. Online surveys are used for economists in the financial industry and academia, as well as for representatives of main employer and employee organisations and business leaders. Telephone interviews are used for a random selection of individuals in Norwegian households.

The expectations survey is conducted every quarter and was conducted for the first time in February 2002. Ipsos has conducted the survey from Q3 2020. The report is written by Lars Erik Lie. The survey was previously carried out by Epinion, Opinion and TNS Gallup.

The survey

On commission by Norges Bank, Ipsos carries out quarterly surveys in Norway of expectations for inflation, wage growth and interest rates among economists in the financial industry and academia, the social partners, business leaders and households. Norges Bank orients monetary policy towards keeping inflation low and stable. Inflation expectations can influence actual inflation. A survey conducted at regular intervals can provide greater insight into these questions. This report and the main results of the expectations survey are published in full on the webpages of Ipsos (<https://www.ipsos.com/nb-no>). The survey of business leaders was broadened in 2009 to include enterprises with 20 or more employees (compared with 50 or more earlier). In addition, appx. 500 business leaders are now interviewed compared with appx. 300 earlier.

The survey for Q2 2026 was conducted in the period 15 April to 5 May 2026.

Questionnaire

To economists and social partners:

- What do you think the general rise in prices for goods and services will be in 12 months, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in two years, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in five years, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think average rise in real wages will be this year?
- What do you think average rise in real wages will be next year?
- What do you think average rise in real wages will be in 5 years?
- What do you think average wage growth will be this year?
- What do you think average wage growth will be next year?
- What do you think average wage growth will be in five years?

To business leaders:

- What do you think the general rise in prices for goods and services will be in 12 months, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in two years, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general rise in prices for goods and services will be in five years, as measured by the 12-month change in the consumer price index (CPI)?
- Do you expect that over the next 12 months your business's purchase prices will increase more than, increase at approximately the same pace as or increase less than in the past 12-month period?
- Do you expect that over the next 12 months your business's selling prices will increase more than, increase at approximately the same pace as or increase less than in the past 12-month period?
- What do you think the average annual wage growth in your business will be this year?
- What do you think the average annual wage growth in your business will be next year?
- Over the past 12 months, has the profitability of your business, as measured by the operating margin (EBITDA), improved, remained unchanged or weakened?
- Do you think that over the next 12 months, the profitability of your business, as measured by the operating margin (EBITDA), will improve, remain unchanged or weaken?
- Compared with 12 months earlier, does your business currently have more employees, the same number of employees or fewer employees?
- How many more or fewer employees, measured in per cent?
- Do you think that in 12 months, your business will have more employees than currently, the same number of employees or fewer employees?
- How many more or fewer employees, measured in per cent?
- Do you know what the inflation target of the Norwegian Central Bank is?

To households:

- Compared to 12 months ago, how much do you think the prices for goods and services, as measured by the consumer price index (CPI) have changed, measured in per cent?
- Do you think that over the next 12 months, prices for goods and services, as measured by the consumer price index (CPI), will be higher, unchanged or lower than they are currently?
- About how much higher/lower, measured in per cent?
- What do you think the general price in prices for goods and services will be in two to three years, as measured by the 12-month change in the consumer price index (CPI)?
- What do you think the general price in prices for goods and services will be in five years, as measured by the 12-month change in the consumer price index (CPI)?
- Compared with 12 months ago, by how much do you think your wages or pension has changed in per cent?
- By approximately how much do you think your wages or pension will change in per cent over the next 12 months?
- Do you think that over the next 12 months, the level of deposit and lending rates will rise, remain unchanged or fall?
- Do you know what the inflation target of the Norwegian Central Bank is?

Technical comments – Economists and social partners

SAMPLE AND SAMPLING METHOD	The sample consists of experts in the financial industry, academia and social partners, enrolled by Ipsos through email and from respondent lists from the previously conducted surveys. The lists are corrected for respondents who are no longer relevant or no longer wish to participate.
NUMBER OF INTERVIEWS	In this survey, a total of 82 interviews are conducted among economists within academia and the financial industry, as well as representatives of the social partners. The survey includes 41 interviews with economists and 41 interviews with representatives of the social partners.
WEIGHT	The results in this survey are not weighted.
METHOD OF DATA COLLECTION	The fieldwork is done online. Respondents are invited to participate by email.
PERIOD OF DATA COLLECTION	The fieldwork was conducted in the period 15 April – 5 May 2026.
AVERAGE AND MEDIAN	Respondents who answered “I don’t know” are not included in the calculation of average and/or median.
EXTREME OBSERVATIONS	<p>From the 1st quarter of 2025, a trimmed average will be used where 5% from the top and bottom of the distribution are removed as extreme observations for the average figures for price and wage developments. Previously, values that deviated more than 10 percentage points from the median were treated as extreme observations.</p> <p>Economists and social partners are treated as one group when removing extreme observations.</p>
MARGIN OF ERROR	The results must be interpreted within a margin of error of +/- 6.7–15.3 percentage points for the main frequencies. The margin of error for sub-groups and possible contingency tables are greater.

Changes in the questionnaire (2015–2025)

¹ Until Q1 2020, several questions have had the following follow up question: “How likely do you think it is that the general rise in prices for goods and services in (12 months / 2 years / 5 years), as measured by the 12-month change in the consumer price index (CPI) , will be within the following 6 intervals (your answers should sum to 100%): Higher than 4%, From 3% to 4%, From 2,5% to 3%, From 2% to 2,5%, From 1% to 2%, Lower than 1%.” The results from the follow up question have not been published in the report. The follow up question have been removed as of Q1 2020.

² New questions were added in Q4 2022. These are later removed.

³ New questions were added in Q1 2023.

Technical comments – Business leaders

SAMPLE AND SAMPLING METHOD	The sample consists of a representative sample of CEOs, CFOs and purchasing managers in Norwegian businesses with 20 employees or more. The sample comes from a pre-recruited panel. All interviews are done online.
NUMBER OF INTERVIEWS	A total of 538 (weighted) interviews have been conducted among business leaders, of which 269 (weighted) are for businesses with 50 employees or more, and 269 (weighted) are for businesses with less than 50 employees.
WEIGHT	The results in this survey are weighted based on the following variables: geography (region), sector (industry), and number of employees in the business. Weighted base is presented in the report.
METHOD OF DATA COLLECTION	The fieldwork is done online. Respondents are invited to participate by email/SMS.
PERIOD OF DATA COLLECTION	The fieldwork was conducted in the period 15 April – 3 May 2026.
AVERAGE AND MEDIAN	Respondents who answered “I don’t know” are not included in the calculation of average and/or median.
EXTREME OBSERVATIONS	<p>From the 1st quarter of 2025, a trimmed average will be used where 10% from the top and bottom of the distribution are removed as extreme observations for the average figures for price and wage developments. Previously, values that deviated more than 10 percentage points from the median were treated as extreme observations.</p> <p>For the question regarding Norges Bank's inflation target, values that deviate by more than 10 percentage points from the median are removed as extreme observations</p>
MARGIN OF ERROR	The results must be interpreted within a margin of error of +/- 1.8–4.2 percentage points for the main frequencies. The margin of error for subgroups and possible contingency tables are greater.

Question 32: By about how much do you think prices have changed measured in per cent?
 (Comparison of differences in published average for question 32 in the period of 2015 - 2017)

The method for calculating the mean for historical figures in the period of 2015-2017 has been changed; the figures presented in the graph below as “Revised series” are comparable with the results published for the period before 2015.

Results published in the period of 2015-2017 as “Revised series” include those who answer “approximately unchanged” to question 25 as “0” in the mean calculations for question 26.

Results published in the period of 2015-2017 as “the previous published series” do not include those who answer “approximately unchanged” to question 26 as “0” in the mean calculation for question 27.
