WINNING CLAIMS IN UNCERTAIN TIMES

Not everything has changed during Coronavirus: New needs emerge but sustainability stays

WHAT WE DID: Rapid research completed in 2 hours

To understand consumers' priorities in the time of Coronavirus, we tested 32 product and packaging claims with Ipsos DUEL on *Ipsos.Digital*. In just 2 hours, we gathered consumers preferences for food and beverage features/benefits.

WHAT WE LEARNT:

Some established values continue but new priorities also emerge. Consumers continue to be discriminating in their priorities, retaining those that existed pre-covid and also indicating new needs.

1. Sustainability remains a priority for UK consumers with

"Wholesome/Natural", "Biodegradable" and "No additive" scoring in the top three.

This preference is observed in many countries. Ipsos Global Trends show people want products which are healthier and better for the environment. Discover IpsosGlobalTrends2020

2. New opportunities around health benefits emerge: "Sleep better",

"Immunity boost" and "Stress relief" claims performed well.

Helps you sleep better

Provides your family with the immunity boost they need

116

Calms your mood and helps relieve stress

3. But not all health and prevention benefits are embraced with enthusiasm.

Covid specific claims like "Anti-viral pack" or "New plastic pack for extra safety" fall to the bottom, suggesting that benefits around health must be carefully articulated and tested.

61

Packages made with anti-viral material

68

Packaging made from 100% new plastic for extra safety

WHAT IT MEANS FOR MARKETERS:

Research during this time will allow marketers to identify emerging needs and ensure pre-covid values are still important and relevant. While Covid-19 has disrupted many things, consumers remain true to some established beliefs and their desire for a more sustainable world continues to be a priority.

Duel uses a gamified survey design that is informed by behavioural science to screen simple marketing stimuli such as claims, varieties, names and visuals.
