COVID-19

Q.

COVID-19

For each of the following, please tell me how likely or unlikely you think they are to happen…?

More than 80% of the world's population will receive at least one dose of a COVID-19 vaccine

56% **34%** -

Q.

For each of the following, please tell me how likely or unlikely you think they are to happen…?

**More than 80% of the world's population will receive at least one dose of a COVID-19 vaccine**

Base: 22,023 adults aged 18-74 in the United States, Canada, Israel, Malaysia, South Africa, and Turkey, and 16-74 in 27 other countries, October 22 – November 5, 2021.
Online samples in in Brazil, Chile, mainland China, Colombia, India, Israel, Malaysia, Mexico, Peru, Romania, Russia, Saudi Arabia, Singapore, South Africa, and Turkey tend to be more urban, educated, and/or affluent than the general population. The "Global Country Average" reflects the average result for all the countries where the survey was conducted; it has not been adjusted to the population size of each country and is not intended to suggest a total result.

Country	Likely	Unlikely

2021 was a bad year for my country

13-point decrease in Global Country Average compared to 90% who agreed about 2020 when asked last year

Base: 22,023 adults aged 18-74 in the United States, Canada, Israel, Malaysia, South Africa, and Turkey, and 16-74 in 27 other countries, October 22 – November 5, 2021.
Online samples in in Brazil, Chile, mainland China, Colombia, India, Israel, Malaysia, Mexico, Peru, Romania, Russia, Saudi Arabia, Singapore, South Africa, and Turkey tend to be more urban, educated, and/or affluent than the general population. The "Global Country Average" reflects the average result for all the countries where the survey was conducted; it has not been adjusted to the population size of each country and is not intended to suggest a total result.

Ipsos

TECHNICAL NOTE

These are the results of a 33-market survey conducted by Ipsos on its Global Advisor online platform. Ipsos interviewed a total of 22,023 adults aged 18-74 in the United States, Canada, Israel, Malaysia, South Africa, and Turkey, 21-74 in Singapore, and 16-74 in 26 other countries between Friday, October 22 and Friday, November 5, 2021.

The sample consists of approximately 1,000 individuals in each of Australia, Belgium, Brazil, Canada, mainland China, France, Germany, Great Britain, Italy, Japan, Spain, and United States and 500 individuals in each of Argentina, Chile, Colombia, Denmark, Hungary, India, Israel, Malaysia, Mexico, the Netherlands, Peru, Poland, Romania, Russia, Saudi Arabia, South Africa, South Korea, Sweden, Switzerland, and Turkey.

The samples in Argentina, Australia, Belgium, Canada, Denmark, France, Germany, Great Britain, Hungary, Italy, Japan, the Netherlands, Poland, South Korea, Spain, Sweden, Switzerland, and United States can be taken as representative of their general adult population under the age of 75.

The samples in Brazil, Chile, mainland China, Colombia, India, Israel, Malaysia, Mexico, Peru, Romania, Russia, Saudi Arabia, Singapore, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population. The survey results for these countries should be viewed as reflecting the views of the more "connected" segment of their population.

The data is weighted so that each country's sample composition best reflects the demographic profile of the adult population according to the most recent census data.

"The Global Country Average" reflects the average result for all the countries and markets where the survey was conducted. It has not been adjusted to the population size of each country or market and is not intended to suggest a total result.

Where results do not sum to 100 or the 'difference' appears to be +/-1 more/less than the actual, this may be due to rounding, multiple responses, or the exclusion of "don't know" or not stated responses.

The precision of Ipsos online polls is calculated using a credibility interval with a poll of 1,000 accurate to +/- 3.5 percentage points and of 500 accurate to +/- 5.0 percentage points. For more information on Ipsos' use of credibility intervals, please visit the Ipsos website. The publication of these findings abides by local rules and regulations.

GAME CHANGERS

In our world of rapid change, the need for reliable information to make confident decisions has never been greater.

At Ipsos we believe our clients need more than a data supplier, they need a partner who can produce accurate and relevant information and turn it into actionable truth.

This is why our passionately curious experts not only provide the most precise measurement, but shape it to provide True Understanding of Society, Markets and People.

To do this we use the best of science, technology and know-how and apply the principles of security, simplicity, speed and substance to everything we do.

So that our clients can act faster, smarter and bolder. Ultimately, success comes down to a simple truth:
You act better when you are sure.

THANK YOU

GAME CHANGERS
