# THE COURAGE TO GROW

Ipsos Solutions and Strategies in the Inflation Era

September 2022

### Inflation

has quickly become the top concern for people and companies around the world. That's where Ipsos comes in.

We offer a framework to support you and your business through these times, simplifying the complex to guide company strategies in turbulent times.

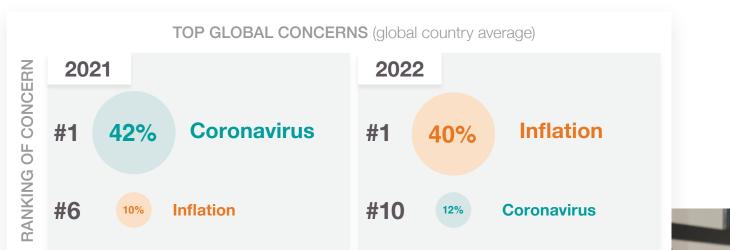

# THE CHALLENGE

Consumers and companies are facing great economic uncertainty, but we are also experiencing significant change on top of change, including a global pandemic, political instability, supply chain disruptions and employee shortages and layoffs.

Business leaders' instincts are typically to contract. However, even in inflationary times, businesses need to find the **courage to drive growth**.

Businesses should choose to play both offense and defense. This means identifying a suite of strategies that address the short-term needs of today, while **keeping an eye on tomorrow** not only optimizing costs and pricing, but also **driving growth to add value**.

# Inflation has quickly become the top concern for people and companies around the world...

Source: What Worries the World, Ipsos Global Advisor. September 2021 – September 2022.

**Consumers** face concerns around the overall cost of living and the future for themselves and their families. Increased cost of goods and experiences have been driving changes in behavior. Uncertainty around salaries, savings and retirement funds is top of mind. **Companies** face increasing production costs, which pose challenges in resource allocation. Supply chain issues and shipping costs have disrupted nearly every business globally. Product margins are being squeezed as supply and demand is becoming increasingly more volatile.

## LET IPSOS BE YOUR GUIDE

The above challenges are daunting. But Ipsos leverages our deep knowledge of society, markets, and people to help brands. We are at the forefront of keeping the pulse on consumer behavior and sentiment during these times. We have been proactively gathering input and insights globally on how consumers and companies feel about inflation, and what behaviors have been shifting as a result of the current economic scenario.

# We see that people are feeling the crunch; leading to changes in sentiment and purchase behaviors

Ipsos tracks consumer behavior to help companies consider how consumers may react. That can vary across categories. Ipsos examines:

#### **Elasticity of Demand**

Is the demand a "must-have" or can consumers live without it under pricing pressure?

#### **Risk of Substitutes**

Are there potential alternatives that pose a risk based on the current options available?

#### **Inflation Relativity**

How is the current scenario impacting other brands and categories?

And we've developed a handful of **inflation-specific offers** to address companies' most pressing questions:

- How can I best understand the new context? How is inflation impacting consumer behaviors, attitudes, and emotions?
- What can we do immediately to optimize our retail category plans; both in store and online?
- What is the smartest way to strengthen my brand value proposition and emerge stronger? How can I reframe value in this context?
- How should I optimize my internal mix for this inflationary context? What's the best pricing strategy?
- How do I anticipate what will happen in the future and what can I do now to mitigate risk and maximize potential?
- What does every key decision-maker need to know about inflation?

As a leader in market research, Ipsos harmonizes the right approaches, data sources and technology to provide our clients a total understanding of inflation. We have been proactively gathering input and insights globally on how consumers and companies feel about inflation, and what behaviors have been shifting as a result of the current economic scenario. Below is a sample of inflation-specific solutions, among other services we provide, to help your brand navigate uncertainty and develop strategies to drive growth in inflationary times.

How can I best understand the new context? How is inflation impacting consumer behaviors, attitudes, and emotions?

#### Inflation Essentials

Deliverables & Outputs

We then define relevant potential

We then conduct an Activation session (or series of sessions with different focus areas) through the lenses of the future scenarios to help you drive strategic decision-making.

For details, please contact: Philip.Ryan@ipsos.com

#### As I increase prices, how will my customers' expectations on their experience shift and what do I need to do to retain them?

#### Anticipating impact on expectations

Custom research with your customers or the lpsos panel to determine how changes to price translate to new or heightened expectations for customer experience delivery.

#### **Indicative Investment** & Timina

\$60K-\$150K, Timing TBD based on Scope of Engagement

#### Why Ipsos?

We amplify CX Insights by uncovering the emotional drivers behind customer experience perceptions. We apply a proprietary framework, CX Forces, to understand the touchpoints and experience elements that promote strong customer relationships.

As prices rise, sensitivity and elasticity for existing customers change as a function of current satisfaction (NPS, CSAT), demographic realities, and emotional drivers. We explore these factors to help brands optimize their messaging to current customers, identify at-risk segments who may churn in reaction to rising prices, and develop new ideas for promoting loyalty. We leverage access to over 40 data partnerships, where beneficial, to round out our understanding of your customer.

For details, please contact: Philip.Ryan@ipsos.com
