## State of the country

Q: Generally speaking, would you say things in this country are heading in the right direction, or are they off on the wrong track?

## State of the economy

Q: How would you describe the current economic situation in your country?

# DIRECTION OF TRAVEL

A man in a dark suit is seen from the side, talking on a mobile phone. He is standing in front of a large, circular wall that is covered in a dense grid of many small national flags from various countries. The flags are arranged in a circular pattern, creating a colorful, globe-like effect. The lighting is soft, and the overall atmosphere is professional and global.

# Methodology

This 29-country Global Advisor survey was conducted between Ovia the Ipsos Online Panel system among 500 adults aged 18-74 in Canada, Israel, Malaysia, South Africa, Türkiye and the United States, 20-74 in Indonesia and Thailand, 21-74 in Singapore, and 16-74 in all other nations.

The "Global Country Average" reflects the average result for all the countries where the survey was conducted. It has not been adjusted to the population size of each country and is not intended to suggest a total result."

The sample consists of approximately 1000+ individuals in each of Australia, Belgium, Brazil, Canada, France, Germany, Great Britain, Italy, Japan, Spain, Sweden, and the US, and approximately 500+ individuals in each of Argentina, Chile, Colombia, Hungary, Indonesia, Israel, Malaysia, Mexico, the Netherlands, Peru, Poland, Singapore, South Africa, South Korea, Thailand and Türkiye.

The sample in India consists of approximately 2,200 individuals, of whom approximately 1,800 were interviewed face-to-face and 400 were interviewed online.

The samples in Argentina, Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Italy, Japan, the Netherlands, Poland, South Korea, Spain, Sweden, and the US can be taken as representative of these countries' general adult population under the age of 75.

The samples in Brazil, Chile, Colombia, India, Indonesia, Malaysia, Mexico, Peru, Singapore, South Africa, Thailand and Türkiye are more urban, more educated, and/or more affluent than the general population. The survey results for these markets should be viewed as reflecting the views of the more "connected" segment of these populations.

India's sample represents a large subset of its urban population – social economic

classes A, B and C in metros and tier 1-3 town classes across all four zones.

Weighting has been employed to balance demographics and ensure that the sample's composition reflects that of the adult population according to the most recent census data.

The precision of Ipsos online polls are calculated using a credibility interval with a poll of 1,000 accurate to +/- 3.5 percentage points and of 500 accurate to +/- 5.0 percentage points. For more information on the Ipsos use of credibility intervals, please visit the Ipsos website.

Where results do not sum to 100 or the 'difference' appears to be +/-1 more/less than the actual, this may be due to rounding, multiple responses, or the exclusion of don't knows or not stated responses

The publication of these findings abides by local rules and regulations.
