The Economic Pulse of the World

Citizens in 25 Countries Assess the Current State of their Country's Economy for a Total Global Perspective

These are the findings of the *Global @dvisor* Wave 90 (G@90), an Ipsos survey conducted between December 23rd and January 6th, 2016.

- The survey instrument is conducted monthly in 25 countries around the world via the Ipsos Online Panel system. The countries reporting herein are Argentina, Australia, Belgium, Brazil, Canada, China, France, Great Britain, Germany, Hungary, India, Israel, Italy, Japan, Mexico, Peru, Poland, Russia, Saudi Arabia, South Africa, South Korea, Spain, Sweden, Turkey and the United States of America.
- For the results of the survey presented herein, an international sample of 18,570 adults aged 18-64 in the US, Israel and Canada, and age 16-64 in all other countries, were interviewed. Approximately 1000+ individuals participated on a country by country basis via the Ipsos Online Panel with the exception of Argentina, Belgium, Hungary, Israel, Mexico, Peru, Poland, Russia, Saudi Arabia, South Africa, South Korea, Sweden and Turkey, where each have a sample approximately 500+. The precision of Ipsos online polls are calculated using a credibility interval with a poll of 1,000 accurate to +/- 3.1 percentage points and of 500 accurate to +/- 4.5 percentage points. For more information on the Ipsos use of credibility intervals, please visit the Ipsos website.
- In countries where internet penetration is approximately 60% or higher the data output is comparable the general population. Of the 25 countries surveyed online, 16 yield results that are balanced to reflect the general population: Argentina, Australia, Belgium, Canada, France, Germany, Hungary, Italy, Israel, Japan, Poland, South Korea, Spain, Sweden, United Kingdom and United States. The eight remaining countries surveyed –Brazil (53% Internet penetration among the citizenry), China (46%), India (19%), Mexico (41%), Russia (59%), Saudi Arabia (59%), South Africa (47%) and Turkey (47%)—have lower levels of connectivity therefore are not reflective of the general population; however, the online sample in these countries are particularly valuable in their own right as they are more urban/educated/income than their fellow citizens and are often referred to as “Upper Deck Consumer Citizens”.

ANALYTIC COMPONENTS...

There are three analytic components that make up the findings of this monthly Economic Pulse report. Each question is tracked and analyzed from questions dealing with:

① The currently perceived macroeconomic state of the respondent's country:

- Thinking about our economic situation, how would you describe the current economic situation in [insert country]? Is it very good, somewhat good, somewhat bad or very bad?

② The currently perceived state of the local economy:

- Rate the current state of the economy in your local area using a scale from 1 to 7, where 7 means a very strong economy today and 1 means a very weak economy.

③ A six month outlook for the local economy:

- Looking ahead six months from now, do you expect the economy in your local area to be much stronger, somewhat stronger, about the same, somewhat weaker, or much weaker than it is now?

a GLANCE**

Summary

- Despite the optimistic ending to 2016, 2017 has not started on a positive note, with all three economic indicators stumbling right out of the gate. The future will show if this a momentary glitch, or a sign of things to come.
- The national economic assessment average (40%) is down two points since last sounding. Driving the index down is a decline among all major players in all regions of the world. In North America (52%, -6 pts.), both Canada (52%, -9 pts.) and the United States (52%, -3 pts.) are down since last sounding. In Latin America (28%, - 4pts.) all countries have experienced a decline. APAC (47%, -3 pts.) is down as well, driven primarily by losses in Japan (29%, -9 pts.), South Korea (7%, -9 pts.) and China (74%, -5 pts.). Middle East/Africa (45%, + 1pt.) is the only region in the positive territory in the first month of the new year.
- The local economic assessment average (32%) is down two points since last month. Similar to the national assessment, the majority of countries have experienced a decline since last sounding. There are only five countries that has have experienced an improvement since last wave: Sweden (56%, +5 pts.), Poland (26%, +4 pts.), Israel (56%, + 3pts.), Saudi Arabia (58%, + 2pts.) and Turkey (30%, +1 pt.).
- The future local assessment (26%) is down two points since last sounding as well. The six-month outlook on the local economy is in the negative territory for North America (28%, -5 pts.), Latin America (44%, -3 pts.), APAC (29%, -3 pts.) and Middle East/Africa (27%, -1 pt.). Europe (15%, N/C) is the only region of the world without change since the last month of 2016.

Global Average of National Economic Assessment Down Two Points: 40%

- The average global economic assessment of national economies surveyed in 25 countries is down two points with 40% of global citizens rating their national economies as 'good'.
