

**IPSOS  
GLOBAL NEWS  
YEAR-END POLL  
2017 – PUBLIC  
SAFETY**

# Methodology

- These are the findings of an Ipsos poll conducted from December 10 to December 14, 2017, exclusively for Global News.
- A sample of n= 2,098 Canadians aged 18+ was sampled via the Ipsos I-Say panel and non-panel sources.
- Quotas and weighting were employed to ensure that the sample reflects that of the Canadian population by region, age and gender according to Canadian census information.
- The precision of Ipsos online polls is measured using a credibility interval. In this case, the results of the poll are considered accurate to within +/- 2.4 percentage points, 19 times out of 20, of what the results would be had all Canadian adults been polled.
- Credibility intervals are wider among subsets of the population.

# PUBLIC SAFETY IN CANADA

## PUBLIC SAFETY IN CANADA

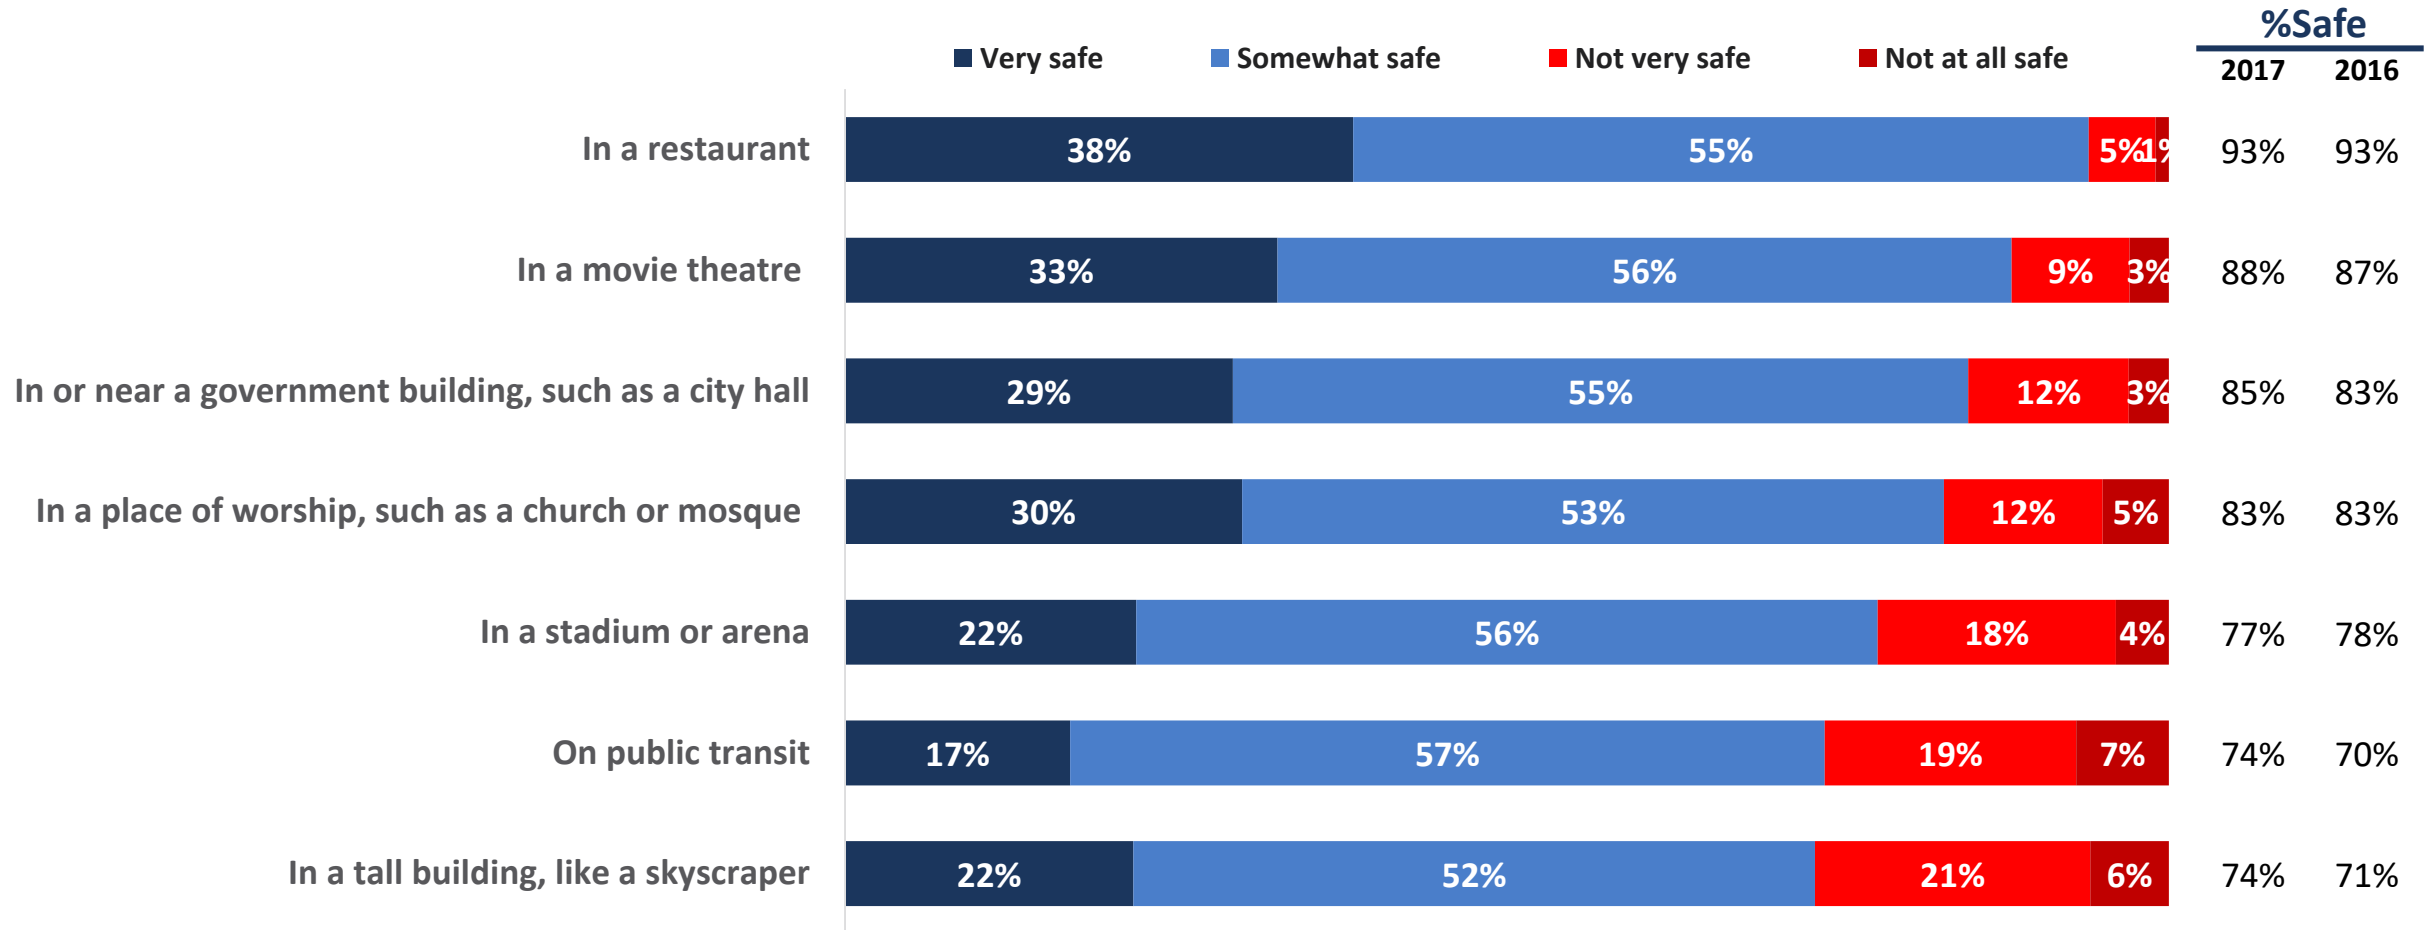

# Two in ten (22%) Canadians are feeling less safe in public spaces compared to a year ago. Just 7% feel more safe

More safe About as safe Less safe

# PUBLIC SAFETY IN CANADA

**One quarter (26%) of Canadians say they don't feel safe in a tall building or on public transit. Most results are consistent with last year, with the exception of transit where feelings of safety are up 4 points**

# THREATS TO CANADIAN SAFETY AND SECURITY

## Canadians view home-grown radicalized terrorists within Canada as being bigger threat than political extremists, Iran, Syria and Russia
