

These are the findings from a special Ipsos survey conducted with International Women's Day to explore attitudes and misperceptions around the "Press for Progress" themes.

The results highlight how wrong people across the world are about some key equality issues.

MOST
IMPORTANT ISSUES FACING WOMEN AND GIRLS

## Which two or three, if any of the following, do you think are the most important issues facing women and girls in (COUNTRY)?

Across the study, sexual harassment is seen as the most important issue facing women. This is followed by sexual violence, with around one in five picking out physical violence, domestic abuse and equal pay. Women and men choose similar issues, although unpaid domestic labour is more of an issue for women
\% mentions of each issue across all

## PHYSICAL/ SEXUAL VIOLENCE BY PARTNER

Out of every 100 women in [COUNTRY], how many do you think say they have been a victim of physical and/or sexual violence by a current or former partner or spouse at some point in their life?

Every country overestimates the scale of violence women experience from partners, which is likely to reflect the level of concern people have about physical/sexual violence against women

| Country | too low | \% point difference | too high | Women Avg. guess (44\%) | Men Avg. guess (35\%) | Actual <br> (25\%) |

## At the current rate of progress, in which year will men and women have EQUAL PAY in [COUNTRY]?

In Great Britain and the US people are way too optimistic about how long it will take for men and women to have equal pay in their country, at current rates of progress: people in the US think it will be 2028 on average, when it will actually be 2059, and in the UK people think it will be 2035 when will actually be 2117 .

ECONOMIC EQUALITY

At the current rate of progress, how long in years will it take for men and women to have economic equality across the entire world?

Every country hugely underestimates how long it will take for women to have economic equality across the world, with some guessing over 200 years too early.
Economic equality is defined as equality between women and men based on economic, health, education and political indicators.

Average guess
Actual 217 years

Year difference from actual 117 years 167 years 167 years 167 years 167 years 167 years 167 years 170 years 177 years 178 years 180 years 187 years 187 years 187 years 187 years 187 years 187 years 192 years 192 years 197 years 197 years 197 years 197 years 197 years 202 years 207 years

## FEMALE CEOS

GM

CAME CHANGERS Ipsos

## What \% of Chief Executive Officers (CEOs) of the world's largest 500 companies are women?

ALL countries hugely
overestimate the proportion of female CEOs in the world's top 500 largest companies: the actual figure is only $3 \%$, but guesses average 19\%, and are up to 29\% in Malaysia, Mexico and Peru.

Actual 3\% Average guess (19\%)

## I define myself as a feminist

But when we do not define "feminist" in terms of equal rights, many fewer in all countries say they identify with the term, across both men and women.

Nearly all instances of sexual harassment would end if the woman simply told the man to stop.

Most people in most countries are skeptical that it just takes women to say stop for sexual harassment to end, although men in a number of countries are significantly more likely to believe that.

- In total 19,428 interviews were conducted between 26 January - 9 February, 2018.
- The survey was conducted in 27 countries around the world, via the Ipsos Online Panel system in Argentina, Australia, Belgium, Brazil, Canada, Chile, China, France, Germany, Hungary, India, Italy, Japan, Malaysia, Mexico, Peru, Poland, Russia, Saudi Arabia, Serbia, South Africa, South Korea, Spain, Sweden, Turkey, Great Britain, and the USA.
- Approximately 1000 individuals aged $16-64$ or 18-64 were surveyed in Australia, Brazil, Canada, China, France, Italy, Japan, Russia, Spain, Great Britain, and the USA. Approximately 500 individuals aged 16-64 were surveyed in Argentina, Belgium, Chile, Hungary, India, Malaysia, Mexico, Peru, Poland, Saudi Arabia, Serbia, South Africa, South Korea, Sweden, Turkey.
- Where results do not sum to 100 or the 'difference' appears to be+-1 more/less than the actual, this may be due to rounding, multiple responses or the exclusion of don't knows or not.stated responses.
- Data are weighted to match the profile of the population. 16 of the 27 countries surveyed generate nationally representative samples in their countries (Argentina, Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Italy, Japan, Poland, Serbia, South Korea, Spain, Sweden, and United States). Brazil, Chile, China, India, Malaysia, Mexico, Peru, Russia, Saudi Arabia, South Africa and Turkey produce a national sample that is considered to represent a more affluent, connected population. These are still a vital social group to understand in these countries, representing an important and emerging middle class.

International Women's Day

- The "actual" data for each question is taken from a variety of verified sources. A full list of sources/links to the actual data can be found on the Ipsos website.
