Table Description

1	1. How familiar are you with the term Public-Private Partnership, or a P3 deal?
2	2. In a typical P3 Project, a government contracts private companies to finance and build infrastructure projects (i.e. water treatment, nursing homes, hospitals, transportation infrastructure, etc), with the private-sector business then running the new infrastructure as a for-profit business. Are you aware of the federal government's plan to fund some of its future infrastructure projects using P3 deals?
3	3. To what extent do you support or oppose the use of Public-Private Partnerships (P3s) in Canada to build, maintain and/or run infrastructure developments in Canada?
4	4. Do you believe that P3s - from the building of the infrastructure to the operation of the infrastructure - cost the public more, cost the public less, or are no different than if the government were to fund, build and operate the infrastructure itself:
5	5_1. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - The federal government is transparent about how much infrastructure projects built using P3 deals will cost taxpayers.
6	5_2. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - I am aware of what infrastructure projects the government undertakes on its own, and which projects involve a P3 Partnership.
7	5_3. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - I believe that P3s are in the best interests of Canadians.
8	5_4. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - P3s give private companies and investors too much control over how public infrastructure dollars are spent.
9	5_5. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - P3s use money more efficiently than infrastructure developments run solely by government.
10	5_6. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - P3s add unnecessary costs to major infrastructure projects.
11	5_7. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - P3s are short sighted - they may save on the building costs, but they ultimately cost Canadians more down the road because the government doesn't own the infrastructure.
12	5_8. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - The government should use the P3 Partnership model to fund upcoming major infrastructure projects.
13	5_9. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - When interest rates are low, the government should use its own money or borrowing/funding, not P3s, to fund Canadian infrastructure projects.
14	5. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - Top 2 Box Summary
15	5. To what extent do you agree or disagree with the following statements about Public-Private Partnerships (P3s) in Canada: - Bottom 2 Box Summary

6. The Auditor General of Ontario has recently found that P3 deals have cost the province nearly \$8 billion in extra costs versus what it would have cost had the Ontario government successfully built the projects itself. Knowing this, to what extent do you support or oppose the use of Public-Private Partnerships (P3s) to build, maintain and/or run infrastructure developments in Canada?

1. How familiar are you with the term Public-Private Partnership, or a P3 deal?

When interest rates are low, the government should use its own money or borrowing/funding, not P3s, to fund Canadian P3s are short sighted - they may save on the building costs, but they ultimately cost Canadians more down the road because the P3s give private companies and investors too much control over how public infrastructure dollars are spent.	799 80%	361 79%	165 77%	197 81%	67 81%	82 68%	235 85%	54 82%	261 82%	148 81%	193 83%	107 68%	204 80%	595 80%

6. The Auditor General of Ontario has recently found that P3 deals have cost the province nearly \$8 billion in extra costs versus what it would have cost had the Ontario government successfully built the projects itself. Knowing this, to what extent do you support or oppose the use of Public-Private Partnerships (P3s) to build, maintain and/or run infrastructure developments in Canada?
