Q. Generally speaking, do you think that your outlook on life, your opinions on issues that are important, etc. are the same or different from people from other countries (i.e. Canadians, Germans) generally

Methodology

- In total 20,793 interviews were conducted between 23 March – 6 April, 2018.
- The survey was conducted in 28 countries around the world, via the Ipsos Online Panel system in Argentina, Australia, Belgium, Brazil, Canada, Chile, China, France, Germany, Hungary, India, Italy, Japan, Malaysia, Mexico, Peru, Poland, Rumania, Russia, Saudi Arabia, Serbia, South Africa, South Korea, Spain, Sweden, Turkey, Great Britain, and the USA.
- Approximately 1000 individuals aged 18-65 were surveyed in Australia, Brazil, Canada, China, France, Italy, Japan, Romania, Russia, Spain, Great Britain, and the USA. Approximately 500 individuals aged 18-65 were surveyed in Argentina, Belgium, Chile, Hungary, India, Malaysia, Mexico, Peru, Poland, Saudi Arabia, Serbia, South Africa, South Korea, Sweden, Turkey.
- Where results do not sum to 100 or the 'difference' appears to be +1 more/less than the actual, this may be due to rounding, multiple responses or the exclusion of don't knows or not stated responses.
- The data are weighted to match the profile of the population. 17 of the 28 countries surveyed generate nationally representative samples in their countries (Argentina, Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Italy, Japan, Poland, Rumania, Serbia, South Korea, Spain, Sweden, and United States). Brazil, Chile, China, India, Malaysia, Mexico, Peru, Russia, Saudi Arabia, South Africa and Turkey produce a national sample that is considered to represent a more affluent, connected population. These are still a vital social group to understand in these countries, representing an important and emerging middle class.
