HA02_8 - As you may know there are two main ways that a household can rent their home, private-rented, when it is being rented from a private landlord, and social rented from a local council or housing association.

Which of the ways of renting would provide the best quality housing?

HA02_9 - As you may know there are two main ways that a household can rent their home, private-rented, when it is being rented from a private landlord, and social rented from a local council or housing association. And, overall, which would you say is the best form of renting?

BASE: ALL ADULTS AGED 16+ IN ENGLAND

	There are more people living in social housing than there were five years ago	As well as homes, local councils and housing associations provide other services which help tenants e.g. help finding work	Once someone becomes a tenant in social housing, they are a tenant for life	Social housing offers rents which are lower than rents in the private sector

HA06_2 - Here are some statements about housing that is rented from local councils or housing associations, sometimes called social housing.

For each one I would like you to tell me whether you think it is true or false or whether you don't know.

As well as homes, local councils and housing associations provide other services which help tenants e.g. help finding work

	Social housing is important because it helps people on lower incomes get housing which wouldn't be affordable in the private rented sector	The negative view of the people that live in social housing is unfair	Social housing plays an important role in tackling poverty in Britain	The way social housing is allocated to people is generally unfair	I support more social housing being built in my local area	Social housing discourages those who rent in this way from improving their personal situation	Social housing should be available to people who cannot afford the cost of renting privately, as well as to the most vulnerable	I would never consider living in social housing
