

Human Rights in 2018

A Global Advisor Survey

© 2018 Ipsos. All rights reserved. Contains Ipsos' Confidential and Proprietary information and may not be disclosed or reproduced without the prior written consent of Ipsos.

Methodology

The survey was conducted in 28 countries via the Ipsos Online Panel system: Argentina, Australia, Belgium, Brazil, Canada, Chile, China, Colombia, France, Great Britain, Germany, Hungary, India, Italy, Japan, Malaysia, Mexico, Peru, Poland, Russia, Saudi Arabia, Serbia, South Africa, South Korea, Spain, Sweden, Turkey and the United States of America.

Interviews were conducted between May 25 and June 8, 2018 with 23,249 adults aged 18-64 in Canada and the U.S. and 16-64 in all other countries.

Approximately 1000+ individuals participated on a country by country basis via the Ipsos Online Panel with the exception of Argentina, Belgium, Chile, Colombia, Hungary, India, Mexico, Peru, Poland, Russia, Saudi Arabia, South Africa, South Korea, Sweden and Turkey, where each have a sample of approximately 500+.

Weighting has been employed to balance demographics and ensure that the sample's composition reflects that of the adult population according to the most recent country census data.

A survey with an unweighted probability sample of this size would have an estimated margin of error of +/- 3.1 percentage points for a sample of 1,000 and an estimated margin of error of +/- 4.5 percentage points for a 500 sample 19 times out of 20.

In 17 of the 28 countries surveyed internet penetration is sufficiently high to think of the samples as representative of the wider population within the age ranges covered: Argentina, Australia, Belgium, Canada, France, Germany, Hungary, Italy, Japan, Poland, Serbia, South Korea, Spain, Sweden, Great Britain and United States.

Brazil, Chile, China, Colombia, India, Malaysia, Mexico, Russia, Peru, Saudi Arabia, South Africa and Turkey have lower levels of internet penetration and so these samples should not be considered to be fully nationally representative, but instead to represent a more affluent, connected population. These are still a vital social group to understand in these countries, representing an important and emerging middle class.
