[Table of contents](#)

A national strategy for diabetes could prevent millions of Canadians from developing diabetes or its complications by enhancing prevention, screening and treatment of diabetes, all with a goal of improving the health of Canadians. If a political party prioritized and increased investment in diabetes to implement a national diabetes strategy, would you be more or less likely to support/vote for this party?

And if a political party prioritized and increased investment in diabetes to implement a national diabetes strategy, would you be more or less likely to support/vote for this party? Again, a national strategy for diabetes could prevent millions of Canadians from developing diabetes or its complications by enhancing prevention, screening and treatment of diabetes, all with a goal of improving the health of Canadians.
