

2. As you may know, it is now legal in Canada for a person who is suffering intolerably from an incurable medical condition to end their life with the help of a doctor or nurse practitioner, as long as certain criteria are met. Do you support or oppose a person's right to access medically-assisted dying, as long as they are eligible under federal law?

3. Some publicly-funded hospitals in Alberta refuse to allow or provide medically-assisted dying on-site because of their beliefs or religious affiliation. These hospitals say they have a right not to provide treatments that don't align with their views, and that patients must go elsewhere to access these services. Others say that all hospitals that receive public funds have an obligation to provide a full range of legal health-care services, as long as they have the proper equipment and staff to do so. Which is closer to your point of view?
