Top environmental issues around the world

- Across the world, global warming/climate change, air pollution, and dealing with waste are the top three environmental issues of concern.
- Meanwhile, soil erosion, flooding, future food sources and supplies, and poor quality drinking water are reported as less concerning issues.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders?

[TOPIC] is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders?

[TOPIC] is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Global warming or climate change

- Global warming, or climate change, is the observation that the Earth has seen an average global temperature increase over recent centuries. Scientists expect these changes to have a corresponding effect on the weather and climate systems of the Earth.
- The US is the 6th most likely to consider global warming/climate change a top environmental issue.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Global warming

By Country Detail

■ Global warming or climate change is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Air pollution

- Air pollution refers to the existence of harmful or excessive quantities of gases or particulates in the atmosphere.
- Americans are one of the least inclined to consider air pollution a top environmental issue.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Air pollution

By Country Detail

■ Air pollution is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Dealing with waste

- As global income increases, so too will the demand for goods and the waste generated from the production and use.
- As a major waste producing country, the US falls just slightly above the world average in considering dealing with waste a top environmental issue

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Dealing with waste

By Country Detail

■ Dealing with the amount of waste we generate is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Water pollution

- *Water pollution refers to the contamination of water bodies. Usually, contaminants are introduced by human activities such as farming or waste production.*
- *The US falls right at the global average in likeliness to consider water pollution a top concern, but is the most likely Western, developed nation to think so.*

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Water pollution

By Country Detail

■ Water pollution is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Future energy sources and supplies

- Some energy sources take millions of years to develop and are depleted after one use.
- Energy use of this form has a finite supply, whether it be in the short term or the long term.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Future energy sources and supplies

By Country Detail

■ Future energy sources and supplies are a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Deforestation

- *Deforestation increases the amount of carbon dioxide in the atmosphere, leading to a stronger greenhouse effect.*
- *Developed countries, like the US, are less likely to see deforestation as top environmental issue.*

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Deforestation

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Natural resource depletion

- Natural resource depletion is a difficult discussion topic.
- On the one hand natural resources are finite.
- On the other hand, though, they are necessary to produce goods and services needed across the entire global population.
- The US is more likely to see this as a top concern than other Western countries.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Natural resource depletion

By Country Detail

■ Natural resource depletion is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Overpopulation

- As the global population grows, so too will competition for space and resources.
- Americans are only marginally more likely to consider overpopulation a top concern than global average.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Overpopulation

By Country Detail

■ Overpopulation is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Wildlife conservation

- According to the World Wildlife Foundation, the number of wild animals on Earth has halved in the past 40 years.
- The US falls near the upper-middle in terms of considering wildlife conservation a top environmental issue.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Wildlife conservation

By Country Detail

■ Wildlife conservation is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Poor quality drinking water

- Cape Town, South Africa's recent drought still affects how South Africans view the availability of clean water, as they lead all countries surveyed in thinking that poor quality drinking water is a major problem.
- The US is the only highly developed nation that considers poor quality drinking water a top environmental issue.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Poor quality drinking water

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Future food sources and supplies

- The global population is expected to continue growing and to need to produce greater and greater quantities of food.
- Countries in Latin America are less likely to consider this a top issue compared to many Asian and European countries. The US falls in the upper middle half.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Future food sources and supplies

By Country Detail

■ Future food sources and supplies are a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Emissions

- A common example of an emission can be seen in the gas discharged from a car's tailpipe.
- Only 12% of those in Western developed nations such as the US, Germany, and Great Britain, consider emissions a top environmental issue.
- Eastern European countries are the most likely to consider this a top issue.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Emissions

By Country Detail

■ Emissions are a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Flooding

- *The World Resources Institute estimates that 4.24% of the world's population is exposed to river flood risk.*
- *Only a small portion of Americans consider flooding a major issue.*

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Flooding

By Country Detail

■ Flooding is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Over-packaging of consumer goods

- In a world that is increasingly reliant on e-commerce and shipping, overpackaged goods run the risk of creating unnecessary waste.
- Despite having the largest consumer market in the world, the US falls way below the global average in amount of those who consider over-packaging a major issue.

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Over-packaging of consumer goods

By Country Detail

■ The over-packaging of consumer goods is a top three environmental issue

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Soil erosion

- *Soil erosion refers to the removal of the Earth's topsoil, the most fertile, uppermost layer of the ground.*
- *The US is the second least likely, by just 1-point, to consider soil erosion a top environmental issue.*

Q. In your view, what are the three most important environmental issues facing [COUNTRY] today? That is, the top environmental issues you feel should receive the greatest attention from your local leaders? – Soil erosion

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Non-Recyclable Product Waste

How concerned is the world with non-recyclable product waste?

Concern with the use of disposable, non-recyclable products

- Plastic straws, for example, are given by default in nearly every drink purchased at a restaurant, then thrown away.
- These straws are non-recyclable and take 200 years to degrade.
- In general, citizens across the world are at least somewhat concerned with the overuse of disposable, non-recyclable products.

Q. Some people have recently been discussing the effects on the environment of plastic packaging, plastic bags, and other disposable objects which cannot be recycled. How concerned, if at all, would you say you are about this issue?

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Non-Recyclable Product Waste

What kind of policy action should be taken?

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Government investment to improve recycling

- Increasing government investment in recycling would require a tax increase, or a decrease in funding for another sector.

Q. Which if any of the following do you think would be effective at reducing the problems caused by unnecessary use of plastic and packaging that cannot be recycled? – Forcing local government to spend more on recycling so that a wider range of items can be recycled

By Country Detail

■ This policy would be effective in reducing the use of non-recyclable products

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Higher taxes on supermarkets and shops using a lot of non-recyclable packaging

- Increasing taxes on supermarkets or shops that use a lot of this kind of packaging would incentivize these businesses to find alternative products or to raise their prices

Q. Which if any of the following do you think would be effective at reducing the problems caused by unnecessary use of plastic and packaging that cannot be recycled? – Higher taxes on supermarkets and shops which use a lot of packaging that cannot be recycled

By Country Detail

■ This policy would be effective in reducing the use of non-recyclable products

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Taxing non-recyclables

- Taxing non-recyclable containers would put the onus of reduction on the consumers of these goods.

Q. Which if any of the following do you think would be effective at reducing the problems caused by unnecessary use of plastic and packaging that cannot be recycled? – A tax on containers such as plastic drinks, bottles, and disposable coffee cups that cannot be recycled to increase their price

By Country Detail

■ This policy would be effective in reducing the use of non-recyclable products

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Public info campaign

- A public information campaign seeks to educate consumers and producers about the consequences of their actions in the hope of changing behaviour without a financial incentive

Q. Which if any of the following do you think would be effective at reducing the problems caused by unnecessary use of plastic and packaging that cannot be recycled? – A public information campaign funded by taxpayers' money to tell people about the issue

By Country Detail

■ This policy would be effective in reducing the use of non-recyclable products

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

The government "naming and shaming" bad businesses

- "Naming and shaming" culpable businesses could incentivize decreased use if the negative publicity begins to have an effect on sales.

Q. Which if any of the following do you think would be effective at reducing the problems caused by unnecessary use of plastic and packaging that cannot be recycled? – The government "naming and shaming" supermarkets and shops which use a lot of packaging that cannot be recycled

■ This policy would be effective in reducing the use of non-recyclable products

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Fines for households that do not recycle enough

- A fine policy would require investment in the infrastructure that provides households the opportunity to recycle.

Q. Which if any of the following do you think would be effective at reducing the problems caused by unnecessary use of plastic and packaging that cannot be recycled? – Big fines for householders who do not recycle enough of their rubbish

■ This policy would be effective in reducing the use of non-recyclable products

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Non-Recyclable Product Waste

What personal actions are citizens taking?

Who's responsible?

- A majority of people worldwide believe somebody has the responsibility for reducing unnecessary packaging.*

Q. Who if anybody do you believe should take most responsibility for finding a way to reduce the amount of unnecessary packaging which is sold?

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Who's responsible? 2019 vs. 2018, Global data

Q. Who if anybody do you believe should take most responsibility for finding a way to reduce the amount of unnecessary packaging which is sold?

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

All of the above

- Some people believe that all parties should be held responsible for recycling

Q. Who if anybody do you believe should take most responsibility for finding a way to reduce the amount of unnecessary packaging which is sold? - All of the above equally

By Country Detail

■ All of the above

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Packaged good producers

- If packaged good producers took the responsibility, they would need to reduce their production, which would harm profits, or find alternative methods of packaging.*

Q. Who if anybody do you believe should take most responsibility for finding a way to reduce the amount of unnecessary packaging which is sold? - Companies that produce packaged goods

By Country Detail

Companies that produce packaged goods should take responsibility

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

The government

- If the government takes responsibility for the issue, they would need to either invest in infrastructure to reduce unnecessary packaging or create policy to incentivize producers, sellers, or consumers to purchase less of these items.*

Q. Who if anybody do you believe should take most responsibility for finding a way to reduce the amount of unnecessary packaging which is sold? - The government

By Country Detail

■ The government should take responsibility

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Consumers of packaged goods

- If consumers bear the responsibility for the issue, they would have to choose to buy from responsible sellers.*
- This would then incentivize sellers to become responsible, in turn incentivizing producers to decrease their production of unnecessary packaging.*

Q. Who if anybody do you believe should take most responsibility for finding a way to reduce the amount of unnecessary packaging which is sold? - Consumers

By Country Detail

Consumers should take responsibility

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

Sellers of packaged goods

- Sellers of packaged goods are the middlemen, buying from those who produce packaged goods in order to sell to individual consumers.
- If they take responsibility, they would need to find alternative goods to sell to consumers.

Q. Who if anybody do you believe should take most responsibility for finding a way to reduce the amount of unnecessary packaging which is sold? - Companies that sell packaged goods

By Country Detail

Companies that sell packaged goods should take responsibility

Base: 19,519 online adults aged 16-74 across 27 countries February 22 – March 8 2019

- These are the findings of the Global Advisor, an Ipsos survey conducted between February 22 to March 8, 2019.
- The survey was conducted in 28 countries around the world, via the Ipsos Online Panel system in Argentina, Australia, Belgium, Brazil, Canada, Chile, China, Colombia, France, Germany, Great Britain, Hungary, India, Italy, Japan, Malaysia, Mexico, Peru, Poland, Russia, Saudi Arabia, Serbia, South Africa, South Korea, Spain, Sweden, Turkey, and the USA.
- For the results of the survey presented herein, an international sample of 19,519 adults ages 19-74 in South Korea, 18-74 in the US, Canada, China, Malaysia, South Africa and Turkey, and ages 16-74 in all other countries, were interviewed. Approximately 1000+ individuals participated on a country by country basis via the Ipsos Online Panel, with the exception of Argentina, Belgium, Chile, Colombia, Hungary, India, Malaysia, Mexico, Peru, Poland, Russia, Saudi Arabia, South Africa, South Korea, Sweden and Turkey, where each have a sample approximately 500+.
- 15 of the 28 countries surveyed online generate nationally representative samples in their countries (Argentina, Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Italy, Japan, Poland, South Korea, Spain, Sweden, and United States).
- Brazil, China, Colombia, Chile, India, Malaysia, Mexico, Peru, Russia, Saudi Arabia, South Africa and Turkey produce a national sample that is more urban & educated, and with higher incomes than their fellow citizens. We refer to these respondents as “Upper Deck Consumer Citizens”. They are not nationally representative of their country.
- Weighting was then employed to balance demographics and ensure that the sample's composition reflects that of the adult population according to the most recent country Census data, and to provide results intended to approximate the sample universe. A survey with an unweighted probability sample of this size and a 100% response rate would have an estimated margin of error of +/-3.1 percentage points for a sample of 1,000 and an estimated margin of error of +/- 4.5 percentage points 19 times out of 20 per country of what the results would have been had the entire population of adults in that country had been polled. All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error, and measurement error.
