

TOPLINE & METHODOLOGY

ABC News/Ipsos Poll

Conducted by Ipsos KnowledgePanel®
A survey of the American general population (ages 18+)
Interview dates: November 16 – November 17, 2019
Number of interviews, adults: 506

Margin of error for the total sample: +/- 4.8 percentage points at the 95% confidence level

NOTE: All results show percentages among all respondents, unless otherwise labeled. Reduced bases are unweighted values.

*NOTE: * = less than 0.5%, - = no respondents*

Annotated Questionnaire:

1. How closely have you been following the hearings in the House of Representatives about whether or not President Trump should be impeached for his actions related to Ukraine?

	Total
Very closely	21
Somewhat closely	37
Not so closely	24
Not closely at all	18
Skipped	-
<i>Total closely (Net)</i>	<i>58</i>
<i>Total not closely (Net)</i>	<i>42</i>

2. When it comes to the recent impeachment hearings, which one of the following statements comes closest to your point of view?

	Total
President Trump's actions were wrong and he should be impeached by the House and removed from office by the Senate	51
President Trump's actions were wrong and he should be impeached by the House but NOT removed from office by the Senate	6
President Trump's actions were wrong, but he should NOT be impeached by the House or removed from office by the Senate	13
President Trump's actions were NOT wrong	25
Skipped	4

TOPLINE & METHODOLOGY

3. When did you decide that (PIPE IN ANSWER FROM Q2):

Base: Total Answered (provided a response in Q2)	Total (N=493)
After the hearings in the House this past week	21
After the news about Trump and Ukraine was first reported in September, but before the hearings this past week	27
When the news about Trump and Ukraine was first reported in September	19
Before that	32
Skipped	-

TOPLINE & METHODOLOGY

About the Study

This ABC News/Ipsos Poll was conducted November 16 to 17, 2019 by Ipsos KnowledgePanel® – a division of Ipsos. This poll is based on a nationally-representative probability sample of 506 general population adults age 18 or older.

The survey was conducted using the web-enabled KnowledgePanel®, which is the largest and most well-established online panel that is representative of the adult US population. Our recruitment process employs a scientifically developed addressed-based sampling methodology using the latest Delivery Sequence File of the USPS – a database with full coverage of all delivery points in the US. Households are randomly selected from all available households in the U.S. Persons in these households are invited to join and participate in the web-enabled KnowledgePanel®. For those potential panel members who do not already have internet access, Ipsos provides a tablet and internet connection at no cost to the panel member. Those who join the panel and who are selected to participate in a survey are sent a unique password-protected log-in used to complete surveys online. As a result of our recruitment and sampling methods, samples from KnowledgePanel cover all households regardless of their phone or internet status and provide fully representative online samples to the research community.

The study was conducted in both English and Spanish. The data were weighted to adjust for gender by age, race, education, Census region, metropolitan status, household income, and party identification. The demographic benchmarks came from the 2019 March supplement of the U.S. Census Bureau's Current Population Survey (CPS). Party ID benchmarks are from recent ABC News/Washington Post telephone polls. The weighting categories were as follows:

- Gender (Male/Female) by Age (18–29, 30–44, 45–59, and 60+)
- Race/Hispanic Ethnicity (White/Non-Hispanic, Black/Non-Hispanic, Other or 2+ Races/Non-Hispanic, Hispanic)
- Education (Less than High School, High School graduate, Some College, Bachelor and beyond)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan status (Metro, non-Metro)
- Household Income (Under \$25,000, \$25,000-\$49,999, \$50,000-\$74,999, \$75,000-\$99,999, \$100,000-\$149,999, \$150,000+)
- Party ID (Democrat, Republican, Independent, Other/None)

The margin of sampling error is plus or minus 4.8 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.22. The margin of sampling error is higher and varies for results based on sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.
