Technical Note

The survey is an international sample of 14,004 adults aged 18-74 in the United States and Canada and 16-74 in all other countries. Interviews were conducted between 25 October and 8 November 2019.

The survey was conducted in 18 countries around the world, via the Ipsos Online Panel system in Australia, Belgium, Canada, China, France, Germany, Hungary, Italy, Japan, Netherlands, Poland, Russia, Saudi Arabia, South Korea, Spain, Sweden, Great Britain, and the US.

Approximately 1000 individuals were surveyed in Australia, Canada, China, France, Germany, Italy, Japan, Spain, Great

Britain, and the US. Approximately 500 individuals were surveyed in Belgium, Hungary, Netherlands, Poland, Russia, Saudi Arabia, South Korea, Sweden.

Where results do not sum to 100 or the “difference” appears to be +/-1 more/less than the actual, this may be due to rounding, multiple responses or the exclusion of don't knows or not stated responses.

Data are weighted to match the profile of the population. 15 of the 18 countries surveyed generate nationally representative samples in their countries (Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Italy, Japan, Netherlands, Poland,

South Korea, Spain, Sweden, and United States). China, Saudi Arabia and South Africa produce a national sample that is considered to represent a more affluent, connected population. These are still a vital social group to understand in these countries, representing an important and emerging middle class.
