Methodology

These are findings of an Ipsos poll conducted on behalf of Global News.

A sample of 1,002 Canadians aged 18 years and over was interviewed on the Ipsos I-Say Panel from December 3-5, 2019.

Weighting was employed to ensure that the sample's composition reflects the overall population according to latest census information.

The precision of online polls is measured using a credibility interval. In this case, the results are accurate to within +/- 3.5 percentage points, 19 times out of 20, of what the results would have been had all Canadians been polled.
