I will make some personal resolutions to do some specific things for myself and others in 2020

Base: 22,512 adults aged 16-64 across Argentina, Australia, Belgium, Brazil, Canada, Chile, China, Colombia, France, Germany, Great Britain, Hungary, India, Israel, Italy, Japan, Malaysia, Mexico, Netherlands, Peru, Philippines, Poland, Romania, Russia, Saudi Arabia, Singapore, South Africa, South Korea, Spain, Sweden, Turkey and the United States.

Technical Note

- These are the findings of the Global Advisor Wave predictions survey for 2020. In total **22,512** interviews were conducted between **26th November – 6th December 2019** among adults aged 18-64 in the US and Canada, and adults aged 16-64 in all other countries.
- The survey was conducted in 33 countries around the world via the Ipsos Online Panel system. The countries reporting herein are Argentina, Australia, Belgium, Brazil, Canada, Chile, China, Colombia, France, Germany, Great Britain, Hong Kong, Hungary, India, Israel, Italy, Japan, Malaysia, Mexico, Netherlands, Peru, Philippines, Poland, Romania, Russia, Saudi Arabia, Singapore, South Africa, South Korea, Spain, Sweden, Turkey and the United States.
- For the results of the survey presented herein, an international sample of 21,011 adults aged 18-64 in the US, Israel and Canada, and age 16-64 in all other countries, were interviewed. Approximately 1,000 individuals participated on a country by country basis via the Ipsos Online Panel, with the exception of Argentina, Belgium, Chile, Colombia, Hong Kong, Hungary, India, Israel, Malaysia, Mexico, Netherlands, Peru, Philippines, Poland, Russia, Saudi Arabia, Singapore, South Africa, South Korea, Sweden and Turkey, where each have a sample approximately 500.
- Weighting was then employed to balance demographics and ensure that the sample's composition reflects that of the adult population according to the most recent country Census data, and to provide results intended to approximate the sample universe. A survey with an unweighted probability sample of this size and a 100% response rate would have an estimated margin of error of +/-3.1 percentage points for a sample of 1,000 and an estimated margin of error of +/- 4.5 percentage points 19 times out of 20 per country of what the results would have been had the entire population of adults in that country had been polled. All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error, and measurement error.
- 17 of the 33 countries surveyed online generate nationally representative samples in their countries (Argentina, Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Israel, Italy, Japan, Poland, Serbia, South Korea, Spain, Sweden, and United States).
- Brazil, Chile, China, Hong Kong, India, Malaysia, Mexico, Netherlands, Peru, Philippines, Romania, Russia, Saudi Arabia, Singapore, South Africa and Turkey produce a national sample that is more urban & educated, and with higher incomes than their fellow citizens. We refer to these respondents as "Upper Deck Consumer Citizens". They are not nationally representative of their country.
- Where results do not sum to 100, this may be due to computer rounding, multiple responses or the exclusion of don't knows or not stated responses.
- Data is weighted to match the profile of the population.
