WHAT WORRIES THE WORLD

November 2019
The majority (61%) of people around the world think things in their country are on the wrong track. Poverty and social inequality currently occupies the top spot for global concern with 33% saying this.

Generally speaking, would you say things in this country are heading in the right direction, or are they off on the wrong track?

Source: Global Advisor
METHODOLOGY
METHODOLOGY

The survey is conducted monthly in 28 countries around the world via the Ipsos Online Panel system. The countries included are Argentina, Australia, Belgium, Brazil, Canada, Chile, China, France, Great Britain, Germany, Hungary, India, Israel, Italy, Japan, Malaysia, Mexico, Peru, Poland, Russia, Saudi Arabia, Serbia, South Africa, South Korea, Spain, Sweden, Turkey and the United States of America.

A survey with an unweighted probability sample of this size would have an estimated margin of error of +/- 3.1 percentage points for a sample of 1,000 and an estimated margin of error of +/- 4.5 percentage points for a 500 sample 19 times out of 20.

For the results of the survey presented herein, an international sample of 19,889 adults aged 18-74 in the US, South Africa, Turkey, Israel and Canada, and age 16-74 in all other countries, were interviewed between October 25th 2019 and November 8th 2019. Approximately 1000+ individuals participated on a country by country basis via the Ipsos Online Panel.

In 17 of the 28 countries surveyed internet penetration is sufficiently high to think of the samples as representative of the wider population within the age ranges covered: Argentina, Australia, Belgium, Canada, France, Germany, Hungary, Israel, Italy, Japan, Poland, Serbia, South Korea, Spain, Sweden, Great Britain and United States.

In 17 of the 28 countries surveyed internet penetration is sufficiently high to think of the samples as representative of the wider population within the age ranges covered: Argentina, Australia, Belgium, Canada, France, Germany, Hungary, Israel, Italy, Japan, Poland, Serbia, South Korea, Spain, Sweden, Great Britain and United States.

Brazil, Chile, China, India, Malaysia, Mexico, Russia, Peru, Saudi Arabia, South Africa and Turkey have lower levels of internet penetration and so these samples should not be considered nationally representative, and instead be considered to represent a more affluent, connected population. These are still a vital social group to understand in these countries, representing an important and emerging middle class.

The precision of Ipsos online polls are calculated using a credibility interval with a poll of 1,000 accurate to +/- 3.1 percentage points and of 500 accurate to +/- 4.5 percentage points. For more information on the Ipsos use of credibility intervals, please visit the Ipsos website.

Weighting has been employed to balance demographics and ensure that the sample’s composition reflects that of the adult population according to the most recent country census data.
