

As you may know, hereditary chiefs of the Wet'suwet'en Nation in British Columbia oppose the construction of the Coastal GasLink natural gas pipeline in British Columbia, despite the project being approved by the local band councils whose territory the pipeline passes through. Protests by indigenous peoples and their supporters have blocked project construction in BC and have also spread to other regions of the country, including blocking main rail lines moving freight and passengers. Before today, how familiar were you with this situation?
