

PRESS RELEASE

Reuters/Ipsos Poll: 2020 Democratic Primary Tracker

About the Study

These are some of the findings of an Ipsos poll conducted between January 31- February 3, 2020 on behalf of Thomson Reuters. For this survey, a sample of 1,116 Americans age 18+ from the continental U.S., Alaska and Hawaii were interviewed online in English. The sample includes 931 registered voters, 430 Democratic registered voters, 380 Republican registered voters, and 91 independent registered voters. Weighting was then employed to balance demographics to ensure that the sample's composition reflects that of the adult population according to Census data and to provide results intended to approximate the sample universe. The precision of Ipsos online polls is measured using a credibility interval. In this case, the poll is accurate to within ± 3.3 percentage points, 19 times out of 20, had all Americans been polled. The credibility interval will be wider among subsets of the population. All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error, and measurement error. The poll also has a credibility interval ± 3.7 percentage points for registered voters, ± 5.4 percentage points for Democratic registered voters, ± 5.7 percentage points for Republican registered voters, and ± 11.7 percentage points for independent registered voters.

For full results, please refer to the following annotated questionnaire.
