Methodology

- **2020:** 27 countries, **19,516** participants, **24 July–7 August 2020** (online):
Argentina, Australia*, Belgium, Brazil*, Canada*, Chile, China*, France*, Germany*, **Great Britain (1,001)***, Hungary, India, Italy*, Japan*, Malaysia, Mexico, Netherlands, Peru, Poland, Russia, Saudi Arabia, South Africa, South Korea, Serbia, Spain*, Sweden, Turkey and the United States of America* ** denotes 1,000+ sample size*
- **2019:** 28 countries, **26 July–9 August 2019:**
Argentina, Australia*, Belgium, Brazil, Canada*, Chile, China*, Colombia, France*, Germany*, **Great Britain (1,002)***, Hungary, India*, Italy*, Japan*, Malaysia, Mexico, Peru, Poland, Russia, Saudi Arabia, South Africa, South Korea, Serbia, Spain*, Sweden, Turkey and the United States of America* ** denotes 1,000+ sample size*
- Participants were adults aged 18-64 in the US and Canada, and adults aged 16-64 in all other countries.
- Results may not sum to 100% and combinations to their constituent %s (e.g. very/fairly satisfied) due to computer rounding.
- The 2016-2019 surveys used the same methodology, but the profile of participating countries changed. This means that the **global trend** does not always involve a like-for-like comparison.
- A selection of trends is included. Further information is available:
