

## PUBLIC POLL FINDINGS AND METHODOLOGY

### New Spectrum News/Ipsos polls on COVID-19, voting behavior

Surveys conducted in nine states across the country in the weeks leading up to Election Day.

#### Topline Findings

##### Washington, DC, October 21, 2020

*These are the findings of Ipsos polls conducted between October 7-19, 2020 on behalf of Spectrum News. For this survey, a sample of 11,454 adults age 18+ from California, Florida, Kentucky, Massachusetts, New York, North Carolina, Ohio, Texas, and Wisconsin was interviewed online in English.*

*For California, a sample of 1,400 adults age 18+ from California was interviewed online in English between October 7-15, 2020, including an oversample of 400 respondents in the Los Angeles media market, for a total of 824 interviews in that market. The poll has a credibility interval of plus or minus 3.0 percentage points for all respondents and plus or minus 3.9 percentage points for respondents in the Los Angeles media market.*

*For Florida, a sample of 1,800 adults age 18+ from Florida was interviewed online in English between October 7-15, 2020. The sample includes an oversample of 400 respondents in the Orlando media market, for a total of 620 interviews in that market, and an oversample of 400 in the Tampa media market, for a total of 604 interviews in that market. The poll has a credibility interval of plus or minus 2.6 percentage points for all respondents, plus or minus 4.5 percentage points for respondents in the Orlando and Tampa media markets.*

*For Kentucky, a sample of 1,001 adults age 18+ from Kentucky was interviewed online in English between October 7-15, 2020. The poll has a credibility interval of plus or minus 3.5 percentage points for all respondents.*

*For Massachusetts, a sample of 1,001 adults age 18+ from Massachusetts was interviewed online in English between October 7-15, 2020. The poll has a credibility interval of plus or minus 3.5 percentage points for all respondents.*

*For New York, a sample of 1,451 adults age 18+ from New York State was interviewed online in English between October 7-19, 2020, including an oversample of 451 respondents in the five New York City boroughs, for a total of 850 interviews in those boroughs. The poll has a credibility interval of plus or minus 2.9 percentage points for all respondents and plus or minus 3.8 percentage points for respondents in the five New York City boroughs.*

*For North Carolina, a sample of 1,401 adults age 18+ from North Carolina was interviewed online in English between October 7-15, 2020, including an oversample of 400 respondents in the Raleigh media market, for a total of 658 interviews in that market. The poll has a credibility interval of plus or minus 3.0 percentage points for all respondents and plus or minus 4.4 percentage points for respondents in the Raleigh media market.*

## PUBLIC POLL FINDINGS AND METHODOLOGY

*For Ohio, a sample of 1,400 adults age 18+ from Ohio was interviewed online in English between October 7-14, 2020, including an oversample of 400 respondents in the Cleveland media market, for a total of 652 interviews in that market. The poll has a credibility interval of plus or minus 3.0 percentage points for all respondents and plus or minus 4.4 percentage points for respondents in the Cleveland media market.*

*For Texas, a sample of 1,000 adults age 18+ from Texas was interviewed online in English between October 7-14, 2020. The poll has a credibility interval of plus or minus 3.5 percentage points for all respondents.*

*For Wisconsin, a sample of 1,000 adults age 18+ from Wisconsin was interviewed online in English between October 7-15, 2020. The poll has a credibility interval of plus or minus 3.5 percentage points for all respondents.*

**For full results, please refer to the following annotated questionnaire:**

## PUBLIC POLL FINDINGS AND METHODOLOGY

### About the Study

These are some of the findings of an Ipsos poll conducted between October 7-15, 2020, on behalf of Spectrum News. For this survey, a sample of 11,454 adults age 18+ from California, Florida, Kentucky, Massachusetts, New York, North Carolina, Ohio, Texas, and Wisconsin was interviewed online in English.

- In California, a sample of 1,400 adults age 18+ from California was interviewed online in English between October 7-15, 2020, including an oversample of 400 respondents in the Los Angeles media market, for a total of 824 interviews in that market.
- In Florida, a sample of 1,800 adults age 18+ from Florida was interviewed online in English between October 7-15, 2020. The sample includes an oversample of 400 respondents in the Orlando media market, for a total of 620 interviews that market, and an oversample of 400 in the Tampa media market, for a total of 604 interviews in that market.
- In Kentucky, a sample of 1,001 adults age 18+ from Kentucky was interviewed online in English between October 7-15, 2020.
- In Massachusetts, a sample of 1,001 adults age 18+ from Massachusetts was interviewed online in English between October 7-15, 2020.
- In New York, a sample of 1,451 adults age 18+ from New York State was interviewed online in English between October 7-19, 2020, including an oversample of 451 respondents in the five New York City boroughs, for a total of 850 interviews in those boroughs.
- In North Carolina, a sample of 1,401 adults age 18+ from North Carolina was interviewed online in English between October 7-15, 2020, including an oversample of 400 respondents in the Raleigh media market, for a total of 658 interviews in that market.
- In Ohio, a sample of 1,400 adults age 18+ from Ohio was interviewed online in English between October 7-14, 2020, including an oversample of 400 respondents in the Cleveland media market, for a total of 652 interviews in that market.
- In Texas, a sample of 1,000 adults age 18+ from Texas was interviewed online in English between October 7-15, 2020.
- In Wisconsin, a sample of 1,000 adults age 18+ from Wisconsin was interviewed online in English between October 7-15, 2020.

The sample for this study was randomly drawn from Ipsos' online panel (see link below for more info on "Access Panels and Recruitment"), partner online panel sources, and "river" sampling (see link below for more info on the Ipsos "Ampario Overview" sample method) and does not rely on a population frame in the traditional sense. Ipsos uses fixed sample targets, unique to each study, in drawing a sample. After a sample has been obtained from the Ipsos panel, Ipsos calibrates respondent characteristics to be representative of the population of each state using standard procedures such as raking-ratio adjustments. The source of these population targets is U.S. Census 2019 American Community Survey data. The sample drawn for this study reflects fixed sample targets on demographics. Posthoc weights were made to the population characteristics on gender, age, race/ethnicity, region, and education.

Statistical margins of error are not applicable to online non-probability polls. All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error and measurement error. Where figures do not sum to 100, this is due to the effects of rounding. The precision of Ipsos online polls is measured using a credibility interval. Ipsos calculates a design effect (DEFF) for each study based on the variation of the weights, following the formula of Kish (1965).

- For California, the poll has a credibility interval of plus or minus 3.0 percentage points for all respondents. This study had a credibility interval adjusted for design effect of the following

## PUBLIC POLL FINDINGS AND METHODOLOGY

(n=1,400, DEFF=1.5, adjusted Confidence Interval= $\pm$ 4.5 percentage points). The poll also has a credibility interval of plus or minus 3.9 percentage points for respondents in the Los Angeles media market.

- For Florida, the poll has a credibility interval of plus or minus 2.6 percentage points for all respondents. This study had a credibility interval adjusted for design effect of the following (n=1,800, DEFF=1.5, adjusted Confidence Interval= $\pm$ 4.1 percentage points). The poll also has a credibility interval of plus or minus 4.5 percentage points for respondents in both the Orlando and Tampa media markets.
- For Kentucky, the poll has a credibility interval of plus or minus 3.5 percentage points for all respondents. This study had a credibility interval adjusted for design effect of the following (n=1,001, DEFF=1.5, adjusted Confidence Interval= $\pm$ 5.0 percentage points).
- For Massachusetts, the poll has a credibility interval of plus or minus 3.5 percentage points for all respondents. This study had a credibility interval adjusted for design effect of the following (n=1,001, DEFF=1.5, adjusted Confidence Interval= $\pm$ 5.0 percentage points).
- For New York, the poll has a credibility interval of plus or minus 2.9 percentage points for all respondents. This study had a credibility interval adjusted for design effect of the following (n=1,451, DEFF=1.5, adjusted Confidence Interval= $\pm$ 4.4 percentage points). The poll also has a credibility interval of plus or minus 3.8 percentage points for respondents in the New York City boroughs, and plus or minus 5.3 percentage points for just the NYC oversample (n=451).
- For North Carolina, the poll has a credibility interval of plus or minus 3.0 percentage points for all respondents. This study had a credibility interval adjusted for design effect of the following (n=1,401, DEFF=1.5, adjusted Confidence Interval= $\pm$ 4.5 percentage points). The poll also has a credibility interval of plus or minus 4.4 percentage points for respondents in the Raleigh media market.
- For Ohio, the poll has a credibility interval of plus or minus 3.0 percentage points for all respondents. This study had a credibility interval adjusted for design effect of the following (n=1,400, DEFF=1.5, adjusted Confidence Interval= $\pm$ 4.5 percentage points). The poll also has a credibility interval of plus or minus 4.4 percentage points for respondents in the Cleveland media market.
- For Texas, the poll has a credibility interval of plus or minus 3.5 percentage points for all respondents. This study had a credibility interval adjusted for design effect of the following (n=1,000, DEFF=1.5, adjusted Confidence Interval= $\pm$ 5.0 percentage points).
- For Wisconsin, the poll has a credibility interval of plus or minus 3.5 percentage points for all respondents. This study had a credibility interval adjusted for design effect of the following (n=1,000, DEFF=1.5, adjusted Confidence Interval= $\pm$ 5.0 percentage points).
