2_6. Prime Minister Justin Trudeau has recently said that, despite having tens of millions of COVID-19 vaccines on order with various pharmaceutical companies, since Canada doesn't have any domestic production for vaccines, Canadians may need to wait until countries with domestic vaccine production capabilities vaccinate their citizens first before Canada receives the doses it has ordered. To what extent do you agree or disagree with the following statements: - The Federal and Provincial Governments need to start planning today to make sure that Canada is prepared for the next pandemic by ensuring we have companies in Canada who make PPE, medical equipment and vaccines

CA01POPCONSENT. The next questions will be about how you identify as part of different population groups. A ""Prefer not to answer"" option is available for you to select, at your discretion. Collecting such information enables us to provide a more refined research analysis. Participation is always voluntary, and your responses are used for research purposes only, combined with the answers from all other participants. We will provide our client only anonymous, aggregated results. The data will be held for no longer than 12 months. Do you accept the collection of data related to how you identify as part of different population groups?
