

Table of Contents

1	1. Are you a regulated healthcare provider/practitioner? (i.e. nurse, doctor, pharmacist, physiotherapist, etc.)
2	2. Do you identify as a member of the Black community, the Indigenous, First Nations, Inuit or Métis communities, as Person of Colour, or as a member of the LGBTQ2S+ community?
3	3. If a federal election were held tomorrow, which of the following party's candidates would you vote for?
4	4. Which of the following best describes your religious identity?
5	5. Which of the following comes closer to your belief about medical assistance in dying in Canada?
6	6. The Supreme Court of Canada recognized medical assistance in dying as a constitutionally-protected right. According to the court's 2015 Carter v Canada decision, a person has a right to medical assistance in dying if they satisfy all the following criteria: they are a competent adult; they have a grievous and irremediable medical condition (illness, disease or disability); their condition causes them suffering that is intolerable to them; and they clearly consent to the termination of life. Do you support or oppose the Supreme Court's decision?
7	7. Do you support or oppose removing the "reasonably foreseeable" eligibility requirement from the federal assisted-dying law?
8	8. Bill C-7 proposes to allow for this waiver of final consent that would allow a patient in this situation to be provided medical assistance in dying without being competent at the time the request is carried out. Do you support or oppose adding a "waiver of final consent" provision to the federal assisted-dying law?
9	9. Would you support an advance request for medical assistance in dying for a person that had a diagnosis of a grievous and irremediable condition? For example, if a patient has a diagnosis of dementia and, while they are still competent, requests that medical assistance in dying be provided when they reach the circumstances outlined in their advance request?
10	10. Would you support an advance request for medical assistance in dying for patients who are competent at the time of the request even if they are not diagnosed with a grievous and irremediable medical condition? For example, a person with no history of cardiovascular disease may wish to write an advance request specifying that they are to receive an assisted death if they have a stroke and are unable to move or communicate.
11	11. Individuals whose sole condition is mental illness are excluded from access to medical assistance in dying. Do you support or oppose the ability for individuals whose sole underlying condition is a mental illness to request and be considered eligible for medical assistance in dying if they meet the criteria under the law, and if they are determined to have the capacity to provide informed consent?
12	12. A mature minor is a person under the age of majority (18 or 19 depending on the province or territory) who has the capacity to understand and appreciate the nature and consequences of a decision. Mature minors are currently able to make important healthcare or treatment decisions. Do you support or oppose the ability for mature minors to request and be considered eligible for medical assistance in dying if they meet the criteria under the law?
13	13. Do you have a chronic physical or mental condition or disability that has a substantial adverse effect on your ability to carry out day-to-day activities?
14	GENDER
15	AGE
16	EDUCATION
17	REGION
18	INCOME
19	HOUSEHOLD COMPOSITION
20	HHCMP1. How many people are living or staying at your current address?
21	EMPLOYMENT STATUS
22	USMAR2. What is your marital status?
23	PGS01. How much of your household's grocery shopping do you, yourself, do?
24	CAPOPGRP. Are you CA01POPCONSENT. The next questions will be about how you identify as part of different population groups. A ""Prefer not to answer"" option is available for you to select, at your discretion. Collecting such information enables us to provide a more refined research analysis. Participation is always voluntary, and your responses are used for research purposes only, combined with the answers from all other participants. We will provide our client only anonymous, aggregated results. The data will be held for no longer than 12 months. Do you accept the collection of data related to how you identify as part of different population groups?
25	
26	CA01IND. Are you an Indigenous person, that is, First Nations (North American Indian), Métis or Inuk (Inuit)? If ""Yes"", choose the option(s) that best describe(s) you. First Nations (North American Indian) includes both Status and Non-Status Indians.
27	CA02VISMIN. Are you: Mark more than one option or specify, if applicable.

1. Are you a regulated healthcare provider/practitioner? (i.e. nurse, doctor, pharmacist, physiotherapist, etc.)

6. The Supreme Court of Canada recognized medical assistance in dying as a constitutionally-protected right. According to the court's 2015 Carter v Canada decision, a person has a right to medical assistance in dying if they satisfy all the following criteria: they are a competent adult; they have a grievous and irremediable medical condition (illness, disease or disability); their condition causes them suffering that is intolerable to them; and they clearly consent to the termination of life. Do you support or oppose the Supreme Court's decision?

CA01POPCONSENT. The next questions will be about how you identify as part of different population groups. A ""Prefer not to answer"" option is available for you to select, at your discretion. Collecting such information enables us to provide a more refined research analysis. Participation is always voluntary, and your responses are used for research purposes only, combined with the answers from all other participants. We will provide our client only anonymous, aggregated results. The data will be held for no longer than 12 months. Do you accept the collection of data related to how you identify as part of different population groups?
