Other	6	5
Skipped	3	2

TOPLINE AND METHODOLOGY

123. Which of the following, if any, would you say have been the biggest personal benefits you have experienced over the past year, since the COVID-19 pandemic began? You may select up to three.

Wave:	March 5-8
Spending more time with family	24
Spending more time at home	36
Starting or continuing a new hobby	10
Exercising more/Beginning to exercise	11
Slowing down your pace of life	21
Connecting more with friends and family, virtually	12
Commuting or traveling for work less	11
Spending less, or saving more, money	33
Positive career change (e.g. getting a promotion, taking on new responsibilities, taking a new job)	6
Improved physical health	5
Improved mental health	2
Other	2
None of the above	18
Skipped	1

124. Thinking back to this time last year, which of the following events most clearly signified the beginning of the COVID-19 pandemic for you personally? You may select up to two.

Wave:	March 5-8
The U.S. confirming its first coronavirus case, in January	9
The World Health Organization declaring COVID-19 a pandemic, in March	14
The U.S. declaring COVID-19 a national emergency, in March	26
The U.S. issuing travel bans for international travel	8
Your state issuing its first stay-at-home order	39
The 2020 NCAA basketball tournaments ("March Madness") being canceled	4
Professional sports leagues suspending their seasons	6
Concerts or other large-scale events being canceled	8
Travel plans or vacations being canceled or delayed	16
You, or someone you know, showing symptoms or testing positive for COVID-19	5
Someone you know, dying of COVID-19	5
Being told to, or being allowed to, work remotely (Base: employed)	11
Other	5
None of the above	7
Skipped	1

TOPLINE AND METHODOLOGY

Methodology

About the Study

This Axios/Ipsos Poll was conducted March 5 to March 8, 2021 by Ipsos using our KnowledgePanel®. This poll is based on a nationally representative probability sample of 1,001 general population adults age 18 or older.

The survey was conducted using KnowledgePanel, the largest and most well-established online probability-based panel that is representative of the adult US population. Our recruitment process employs a scientifically developed addressed-based sampling methodology using the latest Delivery Sequence File of the USPS – a database with full coverage of all delivery points in the US. Households are randomly sampled from all available households in the U.S. All persons in selected households are invited to join and participate in KnowledgePanel. Ipsos provides selected households that do not already have internet access a tablet and internet connection at no cost to them. Those who join the panel and who are selected to participate in a survey are sent a unique password-protected log-in used to complete surveys online. As a result of our recruitment and sampling methods, samples from KnowledgePanel cover all households regardless of their phone or internet status and findings can be reported with a margin of sampling error and projected to the general population.

The study was conducted in English and Spanish.¹ The data were weighted to adjust for gender by age, race/ethnicity, education, Census region, metropolitan status and household income. The demographic benchmarks came from 2019 American Community Survey (ACS) from the US Census Bureau. The weighting categories were as follows:

- Gender (Male, Female) by Age (18–29, 30–44, 45–59, and 60+)
- Race/Hispanic Ethnicity (White Non-Hispanic, Black Non-Hispanic, Other or 2+ Races Non-Hispanic, Hispanic)
- Education (High School graduate or less, Some College, Bachelor and beyond)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan status (Metro, non-Metro)
- Household Income (Under \$25,000, \$25,000-\$49,999, \$50,000-\$74,999, \$75,000-\$99,999, \$100,000-\$149,999, \$150,000+)

The margin of sampling error is plus or minus 3.2 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.08. The margin of sampling error is higher and varies for results based on sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.

¹ Wave 1 was conducted in English only.

TOPLINE AND METHODOLOGY

About Ipsos

Ipsos is the world's third largest Insights and Analytics company, present in 90 markets and employing more than 18,000 people.

Our passionately curious research professionals, analysts and scientists have built unique multi-specialist capabilities that provide true understanding and powerful insights into the actions, opinions and motivations of citizens, consumers, patients, customers or employees. We serve more than 5000 clients across the world with 75 business solutions.

Founded in France in 1975, Ipsos is listed on the Euronext Paris since July 1st, 1999. The company is part of the SBF 120 and the Mid-60 index and is eligible for the Deferred Settlement Service (SRD).
