QB. To what extent, if at all, do you agree or disagree with the following statements? - Summary
All Adults aged 16-65 in Sweden QB. To what extent, if at all, do you agree or disagree with the following statements?

	Targets for achieving the protection and restoratio n of nature should be based on science	When choosing between products or services, it makes no difference to me if the business supplying these has set targets based on science to protect and restore nature	In the main, the media in Sweden report on issues of inature and climate change in ways that help me to understan dissues issues	climate change in	- what is good for people is often bad	It would take a huge amount of effort for people to protect nature and make it more resilient for future generation s	more attracted to cities that work to protect nature, than to cities that
