Popular Vote (decided voters, leaners included)

Certainty to Vote

53% of Canadians say they're absolutely certain about their vote choice or have already voted

Most committed to vote choice:

DOES THE TRUDEAU GOVERNMENT DESERVE RE-ELECTION?

These are some of the findings of an Ipsos poll conducted between September 10 and 13, on behalf of Global News. For this survey, a sample of n = 2,001 Canadians aged 18+ was interviewed. A sample of n = 1,501 was interviewed online, via the Ipsos I-Say panel and non-panel sources, and respondents earn a nominal incentive for their participation. A sample of n = 500 Canadians aged 18+ was interviewed by live-interview telephone interviewers by landline and cellphone, using random-digit dialing. Quotas and weighting were employed to balance demographics to ensure that the sample's composition reflects that of the adult population according to Census data and to provide results intended to approximate the sample universe. The precision of Ipsos polls which include non-probability sampling is measured using a credibility interval. In this case, the poll is accurate to within ± 2.5 percentage points, 19 times out of 20, had all Canadians been polled. The credibility interval will be wider among subsets of the population. All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error, and measurement error. Ipsos abides by the disclosure standards established by the CRIC, found [here](#).
