METHODOLOGY

These are the findings of an Ipsos online survey conducted between 26 May and 10 June 2022.

The survey was conducted in 28 countries around the world, via the Ipsos Online Panel system in Argentina, Australia, Belgium, Brazil, Canada, Chile, Colombia, Denmark, France, Germany, Great Britain, India, Italy, Japan, Malaysia, Mexico, the Netherlands, Peru, Poland, South Africa, South Korea, Saudi Arabia, Spain, Sweden, Turkey and the United States.

The results are comprised of an international sample of 21,515 adults aged 16-74 in most countries and aged 18-74 in Canada, Turkey and the United States. Approximately 500-1,000 individuals participated on a country by country basis via the Ipsos Online Panel.

The samples in Australia, Belgium, Canada, Denmark, France, Germany, Great Britain, Italy, Japan, the Netherlands, Poland, Spain, Sweden and United States can be taken as representative of their general adult population under the age of 75. The sample in other countries produces a national sample that is more urban and educated, and with higher incomes than their fellow citizens. The survey results for these countries should be viewed as reflecting the views of the more “connected” segment of their population.

Weighting was then employed to balance demographics and ensure that the sample's composition reflects that of the adult population according to the most

recent country Census data.

Where results do not sum to 100 or the difference appears to be plus or minus one point more or less than the actual, this may be due to rounding, multiple responses, or the exclusion of “don’t know” or not stated responses.

The precision of Ipsos online polls is calculated using a credibility interval with a poll of 1,000 accurate to plus or minus 3.5 percentage points. For more information on the use of credibility intervals, please visit the Ipsos website.

The publication of these findings abides by local rules and regulations.

GAME CHANGERS

In our world of rapid change, the need for reliable information to make confident decisions has never been greater.

At Ipsos we believe our clients need more than a data supplier, they need a partner who can produce accurate and relevant information and turn it into actionable truth.

This is why our passionately curious experts not only provide the most precise measurement, but shape it to provide True Understanding of Society, Markets and People.

To do this we use the best of science, technology and know-how and apply the principles of security, simplicity, speed and substance to everything we do.

So that our clients can act faster, smarter and bolder. Ultimately, success comes down to a simple truth:

You act better when you are sure.

**BE
SURE.
ACT
SMARTER.**

GAME CHANGERS
