	across the world																		
	I fear that technological progress is destroying our lives	things common than things that make them different	I trust business leaders to tell the truth	I trust politicians to tell the truth	Having large differences in income and wealth is bad for society overall	I have a lot in common with people my age in the UK	People my age have it harder than older people in the UK	People my age are well equipped for the future	There are things people my age could teach older people	There are things people my age could teach younger people	People are more uncertain in the future	People my age are more open minded about sex	People my age are more accepting of other people	Older people are out of touch with issues faced by people my age	Political parties in the UK care about people	People should be able to identify with whatever gender they feel most comfortable with	Gender does not need to be binary (e.g. only male and female)	It is easier to talk about taboo subjects now than it used to be
