## PUBLIC POLL FINDINGS AND METHODOLOGY

### About the Study

These are some of the findings of an Ipsos poll conducted between November 18 and November 21, 2022. For this survey, a sample of 1,005 Americans age 18+ from the continental U.S., Alaska, and Hawaii was interviewed online in English.

The sample was randomly drawn from [Ipsos' online panel](#), partner online panel sources, and ["river" sampling](#) and does not rely on a population frame in the traditional sense. Ipsos uses fixed sample targets, unique to each study, in drawing a sample. After a sample has been obtained from the Ipsos panel, Ipsos calibrates respondent characteristics to be representative of the U.S. Population using standard procedures such as raking-ratio adjustments. The source of these population targets is U.S. Census 2019 American Community Survey data. The sample drawn for this study reflects fixed sample targets on demographics. Posthoc weights were made to the population characteristics on gender, age, race/ethnicity, region, education, and partisan identification.

Statistical margins of error are not applicable to online non-probability polls. All sample surveys and polls may be subject to other sources of error, including but not limited to coverage error and measurement error. Where figures do not sum to 100, this is due to the effects of rounding. The precision of Ipsos online polls is measured using a credibility interval. In this case, the poll has a credibility interval of plus or minus 3.8 percentage points for all respondents. Ipsos calculates a design effect (DEFF) for each study based on the variation of the weights, following the formula of Kish (1965). This study had a credibility interval adjusted for design effect of the following (n=1,005, DEFF=1.5, adjusted Confidence Interval=+/- 5.3 percentage points).

The results of this poll are trended against the following previous polls:

December 13-17, 2021; N=4,407; CI: +/- 1.8  
February 7-8, 2022; N=1,005; CI: +/- 3.8  
March 14-15, 2022; N=1,005; CI: +/- 3.8  
April 11-12, 2022; N=1,005; CI: +/- 3.8  
May 9-10, 2022; N=1,005; CI: +/- 3.8  
June 29-30, 2022; N=1,003; CI +/- 3.8  
July 27-28, 2022; N=1,006; CI +/- 3.8  
September 1-2, 2022; N=1,001; CI +/- 3.8  
September 28-29, 2022; N=1,004; CI +/- 3.8
