Q10. Thinking more generally now. For this question, by "sub-zero", we mean temperatures below zero degrees Celsius (i.e. below 32 degrees Fahrenheit) – sometimes called "below freezing". Which, if any, of the following countries do you think regularly experience sub-zero temperatures during winter?

Q10. Thinking more generally now. For this question, by "sub-zero", we mean temperatures below zero degrees Celsius (i.e. below 32 degrees Fahrenheit) – sometimes called "below freezing". Which, if any, of the following countries do you think regularly experience sub-zero temperatures during winter?
