

TOPLINE AND METHODOLOGY

Most Americans not worrying about COVID going into 2022 Holidays

Axios-Ipsos Coronavirus special edition finds half of Americans say they are back to pre-COVID routines

Washington, DC, December 6, 2022-- Heading into the 2022 holidays, Americans may be worrying about prices or the inevitable family fight about politics, but few of them are worried about COVID-19. The Axios/Ipsos Coronavirus index shows that with just over a third seeing contracting COVID-19 as a large or moderate risk, most Americans appear to be including the virus in their daily calculus and moving on. Indeed, Half of Americans say they have already returned to pre-COVID routines while only a third report wearing a mask some or all of the time when leaving the home.

- Half of Americans report having returned to pre-COVID routines while a third say it will be a year or more before they are back to normal.
- Two in three Americans went out to eat and/or saw family or friends in the last week while only a quarter reporting changing their behavior to reduce potential exposure to viruses.
- Over half of Americans report having contracted COVID-19 sometime in the past two years. One in five report having the flu or other virus in the past year.
- Americans report their health – including financial health – as mostly unchanged and “good”.
- Americans are supportive of continued government efforts to fight against the coronavirus, however a significant minority says it is time to move on with over two in five respondents saying the America has already spent enough fighting COVID and that it's time to stop and move on.

TOPLINE AND METHODOLOGY

Axios/Ipsos Poll – Wave 71

Conducted by Ipsos using KnowledgePanel®

A survey of the American general population (ages 18+)

Wave:	Interview dates:	Interviews:
Wave 71	December 2 to 5, 2022	1,147

Margin of error for the total Wave 71 sample: +/-3.2 percentage points at the 95% confidence level

NOTE: All results show percentages among all respondents, unless otherwise labeled. Reduced bases are unweighted values.

NOTE: * = less than 0.5%, - = no respondents

Annotated Questionnaire:

2. Have you done the following in the last week?

Self-quarantined – that is, stayed at home and avoided contact with others for 14 days

TOPLINE AND METHODOLOGY

About the Study

The survey was conducted using KnowledgePanel, the largest and most well-established online probability-based panel that is representative of the adult US population. Our recruitment process employs a scientifically developed addressed-based sampling methodology using the latest Delivery Sequence File of the USPS – a database with full coverage of all delivery points in the US. Households are randomly sampled from all available households in the U.S. All persons in selected households are invited to join and participate in KnowledgePanel. Ipsos provides selected households that do not already have internet access a tablet and internet connection at no cost to them. Those who join the panel and who are selected to participate in a survey are sent a unique password-protected log-in used to complete surveys online. As a result of our recruitment and sampling methods, samples from KnowledgePanel cover all households regardless of their phone or internet status and findings can be reported with a margin of sampling error and projected to the general population.

The survey was conducted using KnowledgePanel, the largest and most well-established online probability-based panel that is representative of the adult US population. Our recruitment process employs a scientifically developed addressed-based sampling methodology using the latest Delivery Sequence File of the USPS – a database with full coverage of all delivery points in the US. Households are randomly sampled from all available households in the U.S. All persons in selected households are invited to join and participate in KnowledgePanel. Ipsos provides selected households that do not already have internet access a tablet and internet connection at no cost to them. Those who join the panel and who are selected to participate in a survey are sent a unique password-protected log-in used to complete surveys online. As a result of our recruitment and sampling methods, samples from KnowledgePanel cover all households regardless of their phone or internet status and findings can be reported with a margin of sampling error and projected to the general population.

The study was conducted in English and Spanish.^[1] The data were weighted to adjust for gender by age, race/ethnicity, education, Census region, metropolitan status, household income and party identification. The demographic benchmarks came from the 2022 March supplement of the U.S. Census Bureau's Current Population Survey (CPS). Party ID benchmarks are from recent ABC News/Washington Post telephone polls. The weighting categories were as follows:

- Gender (Male, Female) by Age (18–29, 30–44, 45–59, and 60+)
- Race/Hispanic Ethnicity (White Non-Hispanic, Black Non-Hispanic, Other or 2+ Races Non-Hispanic, Hispanic)
- Education (Less than High School graduate, High School graduate, Some College, Bachelor's and beyond)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan status (Metro, non-Metro)
- Household Income (Under \$25,000, \$25,000-\$49,999, \$50,000-\$74,999, \$75,000-\$99,999, \$100,000-\$149,999, \$150,000+)
- Party ID (Democrat, Republican, Independent, Something else)

^[1] Wave 1 was conducted in English only.

TOPLINE AND METHODOLOGY

The margin of sampling error is plus or minus 3.2 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.19. The margin of sampling error is higher and varies for results based on sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.

TOPLINE AND METHODOLOGY

About Ipsos

Ipsos is the world's third largest Insights and Analytics company, present in 90 markets and employing more than 18,000 people.

Our passionately curious research professionals, analysts and scientists have built unique multi-specialist capabilities that provide true understanding and powerful insights into the actions, opinions and motivations of citizens, consumers, patients, customers or employees. We serve more than 5000 clients across the world with 75 business solutions.

Founded in France in 1975, Ipsos is listed on the Euronext Paris since July 1st, 1999. The company is part of the SBF 120 and the Mid-60 index and is eligible for the Deferred Settlement Service (SRD).
