Table 201

Q210J. Adult social care is currently facing major staff shortages. Below are some actions that could be taken to increase the number of staff in social care. These would require an increase in funding for social care, which may lead to more taxes for individuals or increase how much individuals have to pay for their social care. To what extent do you support or oppose each of the following measures as a way of addressing current workforce shortages?

-A national recruitment campaign for care workers

Table 204

Q210J. Adult social care is currently facing major staff shortages. Below are some actions that could be taken to increase the number of staff in social care. These would require an increase in funding for social care, which may lead to more taxes for individuals or increase how much individuals have to pay for their social care. To what extent do you support or oppose each of the following measures as a way of addressing current workforce shortages?

-A national recruitment campaign for care workers

Table 212

Q210J. Adult social care is currently facing major staff shortages. Below are some actions that could be taken to increase the number of staff in social care. These would require an increase in funding for social care, which may lead to more taxes for individuals or increase how much individuals have to pay for their social care. To what extent do you support or oppose each of the following measures as a way of addressing current workforce shortages?

-Giving local social care leaders more autonomy to address the workforce priorities in their area

Table 216

Q210J. Adult social care is currently facing major staff shortages. Below are some actions that could be taken to increase the number of staff in social care. These would require an increase in funding for social care, which may lead to more taxes for individuals or increase how much individuals have to pay for their social care. To what extent do you support or oppose each of the following measures as a way of addressing current workforce shortages?

-Giving local social care leaders more autonomy to address the workforce priorities in their area

Q210J. Adult social care is currently facing major staff shortages. Below are some actions that could be taken to increase the number of staff in social care. These would require an increase in funding for social care, which may lead to more taxes for individuals or increase how much individuals have to pay for their social care. To what extent do you support or oppose each of the following measures as a way of addressing current workforce shortages?

-Offering more support for living costs to staff

Table 223

Q210J. Adult social care is currently facing major staff shortages. Below are some actions that could be taken to increase the number of staff in social care. These would require an increase in funding for social care, which may lead to more taxes for individuals or increase how much individuals have to pay for their social care. To what extent do you support or oppose each of the following measures as a way of addressing current workforce shortages?
-Offering more support for living costs to staff

Table 227

Q210J. Adult social care is currently facing major staff shortages. Below are some actions that could be taken to increase the number of staff in social care. These would require an increase in funding for social care, which may lead to more taxes for individuals or increase how much individuals have to pay for their social care. To what extent do you support or oppose each of the following measures as a way of addressing current workforce shortages?

-Improving training and development for existing staff

Table 247

Q210K. The following actions to increase the number of staff in social care would require changes to current UK immigration policies.

To what extent do you support or oppose each of the following measures as a way of addressing current workforce shortages?

-Creating cheaper visa processes for social care workers joining the workforce from outside of the UK, for example, removing visa fees for migrants or employers

Table 593

Q226D. Many experts argue that it is becoming more expensive to fund the NHS because of increasing costs of treatments, an ageing population and several other factors. This means that even in order to maintain the current level of care and services provided for free by the NHS, spending on the NHS would have to increase. With that in mind, which, if any, of the following would you most like to see?
Base: All respondents

	Gender			Age							Ethnicity		Working status		Education							Unwtd Total
