

The Royal Foundation - Public Perceptions of Homelessness

Data tables

About the research

The Royal Foundation is set on a "bold new mission to demonstrate that together we can end homelessness in the UK".

- The Royal Foundation wants to leverage the Prince of Wales' personal commitment to the issue and his unique platform to inspire change.
- It is launching a new project in 2023 - Homewards - to tackle homelessness by demonstrating that it can be ended in six locations across the UK.
- This mission will involve convening experts, community leaders, media, private sector, philanthropists and other key people at a local level to create collaborative forums to design and deliver tailored to the location.
- The Foundation wants to create optimism among the public that it is possible and desirable to end homelessness in the UK.

Methodology

- **Online** survey of **3,473 UK adults aged 16+** (questionnaire designed by Ipsos and The Royal Foundation).
- Data was collected via the Ipsos UK Knowledge Panel, an online probability panel.
- Fieldwork was undertaken between **5-10 May 2023** in England, Wales, Scotland and Northern Ireland.
- The sample includes 1,805 completed surveys in England, 561 in Scotland, 572 in Wales and 535 in Northern Ireland.
- Data was **weighted** by age, gender, UK nation (region in England), Index of Multiple Deprivation quintile, education, ethnicity and number of adults in the household in order to reflect the profile of the UK population.
- The crossbreak columns (columns across the top of each table) include demographic and geographic categories. Rural/urban and IMD quintiles are based on panellists' postcodes.

IMD measures are created separately in England, Scotland, Wales and NI). These are measures of the scale of deprivation across small area geographies. All panellists are assigned into quintiles at the point of joining.

The columns labelled **Homelessness cannot be tackled** and **We cannot end homelessness** were derived from Q9 and Q9a, and were each asked of half-samples (with a view to testing the effect of terms 'tackling' and 'ending').

Interpreting the data

The respondents who took part in the survey were a selection of the total UK population.

We can expect an overall sampling tolerance, the upper and lower limit of error, of **+/- 1.5 percentage points** for a 50% finding at the '95% confidence interval' for the survey overall (this will vary for sub-groups and geographies according to their sample sizes). This means that the chances are that the 'true' value will fall within a specified range 95 times out of 100.

As this is a sample of the population, all results are subject to a 'margin of error', which means some differences between sub-groups may not be statistically significant.

Statistical significance is indicated with capital letters in each column, small base (<100) with *, and very small bases (too small to allow any comparison (<30) with **.

Where results (or combinations e.g. % very + % fairly serious problem) do not sum to 100%, this may be due to computer rounding, multiple responses, or the exclusion of "don't know" categories.

Q4. Here are some more things some people have said about homelessness in the UK. To what extent do you agree or disagree with each? -SUMMARY TABLE

Base: All UK adults, age 16+

	Poverty is at the root of many of the problems that can lead to homelessness	It is unfair to take a negative view of people who are homeless	All of us have a role to play in ending homelessness	Homelessness can happen to anyone	There are lots of causes of homelessness	Most homeless people could find somewhere to live if they really tried	I am aware of actions that are being taken to tackle homelessness	Homelessness would be less of an issue if housing was more affordable

Table 159

Q13. In principle, to what extent do you support or oppose the following? -SUMMARY TABLE

Base: All UK adults, age 16+

	Investing money in preventing homelessness from happening	Increasing housing-related benefits to help those who are struggling to pay for their housing so that they don't become homeless	Improving the situation for private sector tenants to reduce the risk of homelessness	Moving people experiencing homelessness to their own homes rather than offering temporary solutions like hostels or BBs	Improving access to services for people who are homeless e.g. to help with alcohol/substance or mental health problems	Providing more support for people who are homeless who are in work to keep their jobs and those who are unemployed to find one	Identifying people who might be at risk of homelessness earlier e.g. when they are using public services such as health and education
