About the Study

These are the findings of a Politico Magazine/Ipsos poll was conducted June 27 to June 28, 2023. For this survey, a sample of 1,005 adults age 18 or older from the continental U.S., Alaska, and Hawaii was interviewed online in English. The sample includes 374 Republicans, 441 Democrats, and 122 independents.

The sample was randomly drawn from [Ipsos' online panel](#), [partner online panel sources](#), and "river" [sampling](#) and does not rely on a population frame in the traditional sense. Ipsos uses fixed sample targets, unique to each study, in drawing a sample. After a sample has been obtained from the Ipsos panel, Ipsos calibrates respondent characteristics to be representative of the U.S. Population using standard procedures such as raking-ratio adjustments. The source of these population targets is U.S. Census 2022 American Community Survey data. The sample drawn for this study reflects fixed sample targets on demographics. Post-hoc weights were made to the population characteristics on gender, age, race/ethnicity, region, education, and political party affiliation.

Statistical margins of error are not applicable to online non-probability polls. All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error and measurement error. Where figures do not sum to 100, this is due to the effects of rounding. The precision of Ipsos online polls is measured using a credibility interval. In this case, the poll has a credibility interval of plus or minus 3.8 percentage points for all respondents. Ipsos calculates a design effect (DEFF) for each study based on the variation of the weights, following the formula of Kish (1965). This study had a credibility interval adjusted for design effect of the following (n=1,005, DEFF=1.5, adjusted Confidence Interval=+/- 5.3 percentage points).

The poll also has a credibility interval of plus or minus 5.7 percentage points for Democrats, plus or minus 6.2 percentage points for Republicans, and plus or minus 10.9 percentage points for independents.
