TOPLINE & METHODOLOGY

About the Study

This Ipsos poll was conducted July 16, 2024, by Ipsos for Reuters using the probability-based KnowledgePanel®. This poll is based on a representative probability sample of 1,202 general population adults age 18 or older in the United States. The sample includes 992 registered voters, 402 Democrats, 361 Republicans, and 331 Independents.

The margin of sampling error for this study is plus or minus 3.1 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.16. The margin of sampling error is higher and varies for results based on other sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent. The poll also has a margin of plus or minus 3.3 percentage points for registered voters, plus or minus 5.2 percentage points for Democrats, plus or minus 5.4 percentage points for Republicans, and plus or minus 5.9 percentage points for independents. The margin of sampling error takes into account the design effect, which is 1.13 among registered voters, 1.11 among Democrats, 1.09 among Republicans, and 1.18 among independents.

The survey was conducted using KnowledgePanel, the largest and most well-established online probability-based panel that is representative of the adult U.S. population. Our recruitment process employs a scientifically developed addressed-based sampling methodology using the latest Delivery Sequence File of the USPS – a database with full coverage of all delivery points in the US. Households invited to join the panel are randomly selected from all available households in the U.S. Persons in the sampled households are invited to join and participate in the panel. Those selected who do not already have internet access are provided a tablet and internet connection at no cost to the panel member. Those who join the panel and who are selected to participate in a survey are sent a unique password-protected log-in used to complete surveys online. As a result of our recruitment and sampling methodologies, samples from KnowledgePanel cover all households regardless of their phone or internet status and findings can be reported with a margin of sampling error and projected to the general population.

The data for the total sample were weighted to adjust for gender by age, race/ethnicity, Census region, education, household income, metropolitan status, and political party identification. The demographic benchmarks came from the 2023 March Supplement of the Current Population Survey (CPS). Political Party benchmarks came from NPORS 2024. More details about the weighting benchmarks for this study can be found below:

- Gender (Male, Female) by Age (18–29, 30–44, 45–59, and 60+)
- Race/Hispanic Ethnicity (White Non-Hispanic, Black Non-Hispanic, Other or 2+ Races Non-Hispanic, Hispanic)
- Education (High School graduate or less, Some College, Bachelors and beyond)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan status (Metro, non-Metro)
- Household Income (Under \$25,000, \$25,000-\$49,999, \$50,000-\$74,999, \$75,000-\$99,999, \$100,000-\$149,999, \$150,000+)
- Political party (Republican, Democrat, Independent, Other/Not Asked/Skipped)
