QTSS. The 10 Year Health Plan is likely to include three key shifts for the NHS. To what extent do you support or oppose each of the following shifts being a top priority for the government?
- Making better use of technology: Examples include better computer systems to improve communication between NHS services so patients only have to tell their story once, and using technology more, such as AI for faster, more accurate diagnosis and robots for more effective treatment.
Base: Respondents in England only

Table 48

QTSS. The 10 Year Health Plan is likely to include three key shifts for the NHS. To what extent do you support or oppose each of the following shifts being a top priority for the government?
- Moving more care from hospitals to communities: This means providing more services like tests, scans, and treatments closer to where people live, in places like GP surgeries, pharmacies, local health centres, and in people's homes. This would allow hospitals to focus on the most serious illnesses and emergencies.
Base: Respondents in England only

Table 52

QTSS. The 10 Year Health Plan is likely to include three key shifts for the NHS. To what extent do you support or oppose each of the following shifts being a top priority for the government?
- Moving more care from hospitals to communities: This means providing more services like tests, scans, and treatments closer to where people live, in places like GP surgeries, pharmacies, local health centres, and in people's homes. This would allow hospitals to focus on the most serious illnesses and emergencies.
Base: Respondents in England only

Table 79

QNCS. The social care system is facing significant challenges, with many people struggling to access the care they need. More people need to use social care services, but there's a shortage of care workers and concerns about the quality and consistency of care provided.
The Labour government's election manifesto promised to reform social care and create a new 'National Care Service', that aims to address challenges with access to care, staff shortages and consistency in care standards across the country.
Before today, were you aware of the government's promise to create a National Care Service?

Table 84

QCROSSPART. The Labour government also promised to seek 'cross-party consensus' for social care reform. This means working with other political parties to agree on how to improve the social care system. While some experts argue this collaborative approach could lead to more widely accepted reforms that last for longer, others emphasise the urgent need for action given the current state of social care. Bearing this in mind, which of the following statements comes closest to your view on how the government should best tackle social care reform?
A. The government should prioritise building cross-party consensus for social care reform, even if this means that it takes longer to deliver reforms to improve care services
B. The government should prioritise delivering social care reform quickly to improve care services, even if this means that not all political parties agree with their reform plans

QCROSSPART. The Labour government also promised to seek 'cross-party consensus' for social care reform. This means working with other political parties to agree on how to improve the social care system. While some experts argue this collaborative approach could lead to more widely accepted reforms that last for longer, others emphasise the urgent need for action given the current state of social care. Bearing this in mind, which of the following statements comes closest to your view on how the government should best tackle social care reform?
A. The government should prioritise building cross-party consensus for social care reform, even if this means that it takes longer to deliver reforms to improve care services
B. The government should prioritise delivering social care reform quickly to improve care services, even if this means that not all political parties agree with their reform plans

Table 94

Q226D. Many experts argue that it is becoming more expensive to fund the NHS because of increasing costs of treatments, an ageing population and several other factors. This means that even in order to maintain the current level of care and services provided for free by the NHS, spending on the NHS would have to increase. With that in mind, which, if any, of the following would you most like to see?
Base: All respondents

QHEALTHWORK. Since the pandemic, more people have been unable to work because of ill health. This has a negative impact on the UK economy. Bearing this in mind, which of the following statements comes closest to your view of the role of the NHS in addressing this?
- A. The NHS should prioritise care and treatment for people who are not able to work because of their health condition so that they can get back into work, even if it means that other people might have to wait slightly longer.
- B. The NHS should not consider people's working status when prioritising care and treatment, even if this means some people are not able to work for longer.

QHEALTHWORK. Since the pandemic, more people have been unable to work because of ill health. This has a negative impact on the UK economy. Bearing this in mind, which of the following statements comes closest to your view of the role of the NHS in addressing this?
- A. The NHS should prioritise care and treatment for people who are not able to work because of their health condition so that they can get back into work, even if it means that other people might have to wait slightly longer.
- B. The NHS should not consider people's working status when prioritising care and treatment, even if this means some people are not able to work for longer.
