

This ABC News/Washington Post/Ipsos poll was conducted among 2,464 U.S. adults, April 18-22, 2025, via the probability-based Ipsos KnowledgePanel®. Results have a margin of sampling error of plus or minus 2 percentage points for the full sample, including design effects due to weighting. Error margins are larger for subgroups. Sampling error is not the only cause of differences in polls.

Survey design, management and analysis were provided by Langer Research Associates (for ABC) and The Washington Post. Sampling, fieldwork and data processing were provided by Ipsos Public Affairs.

Where noted, trend comparisons are to random-digit-dialed telephone surveys ("CATI mode") by ABC News and The Washington Post or others. Questions were reformatted as of January 2024 given the change to a self-administered online questionnaire. Differences from previous results may reflect mode effects.

See full methodological details [here](#).

In the tables below, asterisks in data columns indicate <0.5 percent. "Skip" shows the share of respondents who skipped the question in online administration. "Skip/No opinion" shows the share of respondents who skipped the question or who selected an explicit no opinion option in online administration. Respondents interviewed via telephone were able to volunteer a "no opinion" response.
