Q2. Below are two different aims a political party could have. For these statements, please choose which would make you more likely to vote for a political party, or if it would make no difference. A: We will take strong action against things that cause climate change, even if this increases costs of oil and gas production and requires increased investment in renewable energy supplies/ B: We will slow down actions against things that cause climate change, because it is not necessary, or we can't afford the additional costs right now while there are other priorities

Q4. Below are some steps that the UK could take to reduce how much we rely on imported energy. How much, if at all, do you support or oppose the UK taking each of these steps? - Summary

All adults aged 18-75 in Great Britain

	Q4. Below are some steps that the UK could take to reduce how much we rely on imported energy. How much, if at all, do you support or oppose the UK taking each of these steps?				
	Investing more in renewable energy (e.g. solar, wind, tidal)	Investing more in nuclear energy	Reducing the amount of energy we use in the country by improving the energy efficiency of s and businesses	Re-starting or increasing the UK's own production of fossil fuels (e.g. coal mining, oil production)	Restarting fracking in the UK. Fracking involves drilling into the earth and directing a high-pressure mixture of water, sand and chemicals at a rock layer to release the gas inside

Q4. Below are some steps that the UK could take to reduce how much we rely on imported energy. How much, if at all, do you support or oppose the UK taking each of these steps? - Restarting fracking in the UK. Fracking involves drilling into the earth and directing a high-pressure mixture of water, sand and chemicals at a rock layer to release the gas inside

Q58. And to what extent would you support or oppose having more sources of clean energy generation (such as wind turbines, solar panels and so on) built in your local area in each of these cases? - Summary

All adults aged 18-75 in Great Britain

Q58. And to what extent would you support or oppose having more sources of clean energy generation (such as wind turbines, solar panels and so on) built in your local area in each of these cases?							
	If it reduced your household's energy bills	Even if it changed the appearance of your local landscape	If it had a small or no impact on wildlife and livestock in the area	Even if it would cost taxpayers more in initial building costs	If it was built on brownfield land (land that has been built on before)	If it was built on greenfield land (land that has not been built on before)	Even if it was built on land that could be used for other things, such as housing or food production

Energy

Adults aged 18-75 in Great Britain

Q5B. And to what extent would you support or oppose having more sources of clean energy generation (such as wind turbines, solar panels and so on) built in your local area in each of these cases? - Even if it was built on land that could be used for other things, such as housing or food production

All adults aged 18-75 in Great Britain
