Scottish Political Monitor - December 2025 Tables
(Public)

TAXVIEWS. Below are two different aims a political party could have. For these statements, please choose which would make you more likely to vote for a political party, or if it would make no difference? STATEMENT A: We will increase spending on public services, even if it means that individuals personally pay more in taxes STATEMENT B: We will cut the amount of taxes that individuals pay personally, even if it means spending less on public services

CONVEYS. And below are two different aims a political party could have. For these statements, please choose which would make you more likely to vote for a political party, or if it would make no difference? STATEMENT A: We will take strong action against things that cause climate change, even if this increases costs of oil and gas production and requires increased investment in renewable energy supplies STATEMENT B: We will slow down actions against things that cause climate change, because it is not necessary or we can't afford the additional costs right now while there are other priorities.
