

PUBLIC POLL FINDINGS AND METHODOLOGY

Google / Ipsos Our Life With AI 2025 Survey– Topline

These are some of the findings of an Ipsos poll conducted between September 22 – October 10, 2025, on behalf of Google. For this survey, a sample of roughly 21,000 adults age 18+ were interviewed online in 21 countries. Approximately 1,000 adults age 18 + who are residents of the Canada (CAN), Belgium (BEL), France (FRA), Germany (DEU), Poland (POL), Spain (ESP), Italy (ITA), United Kingdom (GBR), Ireland (IRL), Australia (AUS), India (IND), Japan (JPN), Singapore (SGP), South Korea (KOR), Brazil (BRA), Mexico (MEX), Nigeria (NGA), South Africa (ZAF), United Arab Emirates (ARE), and Argentina (ARG) were interviewed online using Ipsos online panels, partner panel sources, and river sampling. A sample of roughly 1,000 adults age 18+ who are residents of the United States (USA) were interviewed online via the KnowledgePanel®.

NOTE: All results show percentages among all respondents, unless otherwise labeled. Reduced bases are unweighted values.

Annotated Questionnaire:

Q1. How much do you feel you know, if anything, about artificial intelligence (AI) tools and applications?

	Total	USA	CAN	BEL	FRA	DEU	POL	ESP	ITA	GBR	IRL	AUS	IND	JPN	SGP	KOR	BRA	MEX	NGA	ZAF	UAE	ARG
Know a lot	14%	8%	9%	8%	6%	9%	12%	10%	7%	15%	10%	16%	39%	4%	13%	14%	21%	10%	27%	17%	32%	5%

PUBLIC POLL FINDINGS AND METHODOLOGY

About the Study

These are some of the findings of an Ipsos poll conducted between September 22 – October 10, 2025, on behalf of Google. For this survey, a sample of roughly 21,000 adults age 18+ were interviewed online in 21 countries. Approximately 1,000 adults age 18 + who are residents of the Canada (CAN), Belgium (BEL), France (FRA), Germany (DEU), Poland (POL), Spain (ESP), Italy (ITA), United Kingdom (GBR), Ireland (IRL), Australia (AUS), India (IND), Japan (JPN), Singapore (SGP), South Korea (KOR), Brazil (BRA), Mexico (MEX), Nigeria (NGA), South Africa (ZAF), United Arab Emirates (ARE), and Argentina (ARG) were interviewed online using Ipsos online panels, partner panel sources, and river sampling. A sample of roughly 1,000 adults age 18+ who are residents of the United States (USA) were interviewed online via the KnowledgePanel®.

The sample for this study outside of the United States was randomly drawn from Ipsos' online panel, partner online panel sources, and "river" sampling and does not rely on a population frame in the traditional sense. Ipsos uses fixed sample targets, unique to each study, in drawing a sample. After a sample has been obtained from the Ipsos panel, Ipsos calibrates respondent characteristics to be representative of each country's population using standard procedures such as raking-ratio adjustments. The source of these population targets is government census entities. The sample drawn for this study reflects fixed sample targets on demographics. Post-hoc weights were made to the population characteristics on gender, age, region, and education (where available).

Statistical margins of error are not applicable to online non-probability polls. All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error and measurement error. The precision of Ipsos online polls is measured using a credibility interval. In this case, the poll has a credibility interval of plus or minus 3.8 percentage points for all respondents in each country. Ipsos calculates a design effect (DEFF) for each study based on the variation of the weights, following the formula of Kish (1965). This study had a credibility interval adjusted for design effect of the following ($n=1000$, $DEFF=1.5$, adjusted Confidence Interval= ± 5.3 percentage points).

In the United States, interviews were conducted online in English and Spanish using the probability-based KnowledgePanel®. The margin of sampling error for this study is plus or minus 3.2 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error is higher and varies for results based on other sub-samples. The data for the total sample were weighted to adjust for gender by age, race/ethnicity, education, Census region, metropolitan status, language dominance, and household income. The demographic benchmarks came from the 2025 March Supplement of the Current Population Survey (CPS).

In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.

PUBLIC POLL FINDINGS AND METHODOLOGY

About Ipsos

Ipsos is one of the largest market research and polling companies globally, operating in 90 markets and employing nearly 20,000 people.

Our passionately curious research professionals, analysts and scientists have built unique multi-specialist capabilities that provide true understanding and powerful insights into the actions, opinions and motivations of citizens, consumers, patients, customers or employees. Our 75 business solutions are based on primary data from our surveys, social media monitoring, and qualitative or observational techniques.

“Game Changers” – our tagline – summarizes our ambition to help our 5,000 clients navigate with confidence our rapidly changing world.

Founded in France in 1975, Ipsos has been listed on the Euronext Paris since July 1, 1999. The company is part of the SBF 120, Mid-60 indices, and is eligible for the Deferred Settlement Service (SRD).
