I identify with it a little	14%
I do not identify with it at all	55%
Don't know	9%
Skipped	2%
Identify with MAGA (Net)	34%

TOPLINE & METHODOLOGY

About the Study

This Reuters/Ipsos poll was conducted April 15-20, 2026, by Ipsos using the probability-based KnowledgePanel®. This poll is based on a nationally representative probability sample of 4,557 general population adults aged 18 or older.

The study was conducted in English. The data were weighted to adjust for gender by age, race and ethnicity, census region, metropolitan status, education, household income, 2024 vote choice and political party identification. Political party identification benchmarks are from the 2025 NPORS annual survey, with a midyear adjustment estimated across aggregated KnowledgePanel surveys accounting for changes in panelists' party identification over time. The demographic benchmarks came from the 2025 March supplement of the U.S. Census Bureau's Current Population Survey (CPS).

- Gender (Male, Female) by Age (18–29, 30–44, 45-59 and 60+)
- Race/Hispanic Ethnicity (White Non-Hispanic, Black Non-Hispanic, Other, Non-Hispanic, Hispanic, 2+ Races, Non-Hispanic)
- Education (Less than High School, High School, Some College, Bachelor's degree, Master's degree or higher)
- Census Region (Northeast, Midwest, South, West)
- Metropolitan status (Metro, non-Metro)
- Household Income (Under \$25,000, \$25,000-\$49,999, \$50,000-\$74,999, \$75,000-\$99,999, \$100,000-\$149,999, \$150,000+)
- 2024 Vote Choice (Trump, Harris, Another candidate, Did not vote)
- Political Party ID (Democrat, Lean Democrat, Republican, Lean Republican, Independent/Something else)

The margin of sampling error is plus or minus 1.5 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.07. The margin of sampling error is higher and varies for results based on sub-samples. In our reporting of the findings, percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.

About Ipsos

Ipsos is one of the largest market research and polling companies globally, operating in 90 markets and employing nearly 20,000 people.

Our passionately curious research professionals, analysts and scientists have built unique multi-specialist capabilities that provide true understanding and powerful insights into the actions, opinions and motivations of citizens, consumers, patients, customers or employees. Our 75 business solutions are based on primary data from our surveys, social media monitoring, and qualitative or observational techniques.

“Game Changers” – our tagline – summarizes our ambition to help our 5,000 clients navigate with confidence our rapidly changing world.

Founded in France in 1975, Ipsos has been listed on the Euronext Paris since July 1, 1999. The company is part of the SBF 120, Mid-60 indices, and is eligible for the Deferred Settlement Service (SRD).
